Apple Inc (AAPL) Fundamental Analysis, Stock Research ...
 Apple is usually the first company to come out with a new product line before anyone else. This is very risky but it seems to be working to Apples advantage. This shows that taking risks can sometimes make or break you and Apple has great potential and has a lot to improve.
Apple Inc. - AnnualReports.co.uk
 The company, fearful that the Apple II would soon be outdated, put time pressures on the designers of the Apple III, despite the fact that sales of the Apple II more than doubled to 78,000 in 1980. The Apple III was well received when it was released in September 1980 at \$3,495, and many predicted it would achieve its goal of breaking into the office market dominated by IBM. However, the Apple ...
