The major force driving people to embrace wireless computing is Wi-Fi. Once dismissed as a fad, Wi-Fi is rapidly becoming ubiquitous in the US and around the world. In 2004, more than half of all laptops sold in the US shipped with Wi-Fi installed. By 2007, most analysts predict that nearly every laptop sold in the US will include Wi-Fi. Nearly 20 million Wi-Fi access points will be sold this year, up 20% from last year. As these numbers grow, prices will continue to fall, making Wi-Fi more attractive to more and more people. By the end of this year, there will be more than 40,000 hotspots (public Wi-Fi access points) available across the US, in hotels, fast-food restaurants, caf é s, airports - even parks. By 2007, that number will surpass 100,000. From McDonald's to Kinko's to Holiday Inn, Wi-Fi is becoming a "killer amenity." Once Wi-Fi networks are in place, they can be used for much more than just Internet access. For example, the AirPort Express allows users to stream iTunes throughout their homes, wirelessly. Wi-Fi is being used to network printers, cameras and, ultimately, home entertainment devices.

When you hear Apple TV you immediately think it is an actual TV that you are purchasing. But this is not the case. The Apple TV is actually a device that you will use to stream something a little similar to Amazon's Fire or Roku. It is a little black box that is about an inch and a half tall, just a little bit less than four inches, and it runs on a very similar platform to the iPad and the popular iPhones. You can download a list of apps and also games beyond the standard streaming video that you could get from Hulu, Netflix, Amazon, just to name a few. The Apple TV has been centered on various apps, and it is still able to stream multiple TV shows, movies straight to your HDTV, but this is just the tip of the iceberg on the features this box has been packed with. The box allows you to watch and stream podcasts, play your favorite game, stream your workout playlist, and much more. But what is important to note, to enjoy all these benefits this box is ready to provide it will all depend on the apps that you have installed. Some of the apps you will use are free, and some will cost. Think of it this way; the Apple TV is able to turn your TV into a Smart TV. You can either rent your favorite movies or merely stream your collection from your iTunes account. You could also stream movie shows from apps like Hulu Plus or Netflix; stream your music from the Pandora or Apple Music apps. I mean the list is endless on what the Apple TV can actually do for you. The Apple TV 4K has been designed with some of the fastest processors you could find, the same that powers the iPad Pro. The Apple TV box has been made to be as powerful as most laptops we use. It also has a fast graphics processor that has been designed with enough power that could turn the black box into a game console. Nothing sounds better than this. Apple has genuinely revamped the new generation, but this does not mean you have to throw away your older model, just the same thing they have been doing with iPhone. The third generation is still available in the market for you to purchase.

Apple Training Series: Mac OS X Deployment v10.6 uses a combination of task-based instruction and strong visuals to teach intermediate and advanced users how to deploy a wide range of files and systems to multiple users in a large organization. Author Kevin White takes readers through the deployment of software, ranging from individual files, to complete systems, to multiple users, discussing the range of methodologies used. Intermediate users will learn how to use Apple deployment tools, including Disk Utility, PackageMaker, and Apple Software Restore. Advanced users will learn how to customize deployment solutions with scripts to provide post-installation configuration. Throughout the book, users learn how to tie all the solutions together to create fully integrated software and hardware deployment plans. The Apple Training Series serves as both a self-paced learning tool and the official curriculum for the Mac OS X and Mac OS X Server certification programs.
