You've never come across a watch such as this before. The Apple Watch Series 5 is almost perfect, the finest smartwatch you can buy and wear at the moment. Every other smartwatch doesn't come close to rivaling the same measure of fitness tracking, usability, efficiency, or wearability. The Apple Watch has now gone from strength to strength in its fifth version since its launch, incorporating novel features and improving those features where necessary. With the topics covered in this book, you'll enjoy these benefits with your Apple Watch Series 5: It's got a display that never sleeps. It displays the time conspicuously. It can be personalized anyhow you like. It comes with apps to keep watch over your heart (the heart rate monitor is one of the finest in the industry). It informs you when things become a little loud. It allows you to track your cycle with just a tap. It helps you to accomplish your fitness goals. It inspires you to move, workout, and to stand up. It streams your favorite songs. It has a powerful sense of direction. It gets apps in a blink of an eye. It lets you function without your phone nearby. It cries out for help when you need it. It uses Siri effectively.

Whether it's the fitness app that's easy to use, the ability to wirelessly stream music straight to your Bluetooth headphones, AirPods, or AirPods Pro, or using the Apple Watch to make payment with Apple Pay when you're on the move, there is much to like about Apple Watch 5. To some, it's probably an understatement to say it's a game-changer. Do not wait any longer; get this book now to enjoy these benefits!

Design of the In-vehicle Experience Clarkson Potter

The in-vehicle experience, both physical and digital, is increasingly the differentiating factor between vehicles. Since touch displays, smart surfaces, and internet connectivity are present in most vehicle segments, the growing resemblance of in-vehicle experiences with mobile experiences leads to user expectations on par with smartphones. While manufacturers are faced with providing suitable service offerings that are safe to use, they must also identify services to exclude or limit, without encouraging drivers to resort back to their mobile devices. This increasingly complex in-vehicle experience design process is being shaped by new stakeholders, including operating system providers and application developers. Design of the In-vehicle Experience examines the challenging and changing relationships between manufacturers (that lack in software development and mobile experience design skills) and new stakeholders (that lack the decades of experience designing for the driving context). The report also discusses augmenting and expanding existing guidelines and best practices to address the challenges of modern in-vehicle experience design.
