you understand the need to enhance your security online. From office devices to your personal devices at home, you must be keen on securing your networks all the time. We use real life examples to show you how bad a security breach can be. Companies have suffered millions of dollars in damages in the past. Some of these examples are so recent that they may still be fresh in your mind. They help you reexamine your interactions online and question whether you should provide the information that a given website requests. These simple decisions can prevent a lot of damage in the long run. Here's just a tiny fraction of what you'll discover: How the internet is held together with a pinky swear How hackers use raunchy photos to eke out private information Examples of preposterous social engineering attacks Equally preposterous defense from those attacks How people in charge don't even realize what hacking means How there's only one surefire way to protect against hacking Research on past, present, and future hacking methods Difference between good and bad hackers How to lower your exposure to hacking Why companies pester you to attach a phone number to an account Why social media is the most insecure way to spend your afternoon And much, much more Learn about the best software, best practices, and the easy way to protect all your, your business, and your family's private information. Prepare before the damage is done and start building your cybersecurity system today.

A New York Times, USA Today, and Wall Street Journal bestseller In this iconic bestseller, popular business blogger and bestselling author Seth Godin proves that winners are really just the best quitters. Godin shows that winners quit fast, quit often, and quit without guilt—until they commit to beating the right Dip. Every new project (or job, or hobby, or company) starts out fun...then gets really hard, and not much fun at all. You might be in a Dip—a temporary setback that will get better if you keep pushing. But maybe it's

really a Cul-de-Sac—a total dead end. What really sets superstars apart is the ability to tell the two apart. Winners seek out the Dip. They realize that the bigger the barrier, the bigger the reward for getting past it. If you can beat the Dip to be the best, you'll earn profits, glory, and long-term security. Whether you're an intern or a CEO, this fun little book will help you figure out if you're in a Dip that's worthy of your time, effort, and talents. The old saying is wrong—winners do quit, and quitters do win.
