Written by one of the best known object-oriented practitioners in the business, Process Patterns is based on proven, real-world techniques. Scott Ambler shows readers how to successfully deliver large-scale applications using object technology and carefully describes how one develops

applications that are truly easy to maintain and to enhance. He shows how such projects can be supported and points out what is necessary to ensure that one's development efforts are of the best quality. His object-oriented software process (OOSP) is geared toward medium to large-size organizations that need to internally develop software to support their main line of business.

Developers and project managers who have just taken their first OO development course will find this book essential. It describes the only OOSP to take the true needs of development into consideration, including cross-project, maintenance, operations, and support issues. This book uses the Unified Modeling Language (UML).

The New Discipline in IT: Applications Support and Maintenance (ASM) Today's CIOs are charged with an ever-broadening range of responsibilities, chief among them aligning IT with business objectives, and using IT to move the business forward. New technologies and applications that provide businesses with efficiency improvements or competitive advantages are where CIOs' careers are made...or broken. Now consider the fact that up to 90% of enterprise IT spending, and the bulk of CIO attention, is paid not to strategic priorities or future developments, but to the support of existing systems. Only recently have IT leaders begun to appreciate this fact, and that Applications Support and Maintenance (ASM) requires its own skill sets, culture and best practices. Formerly the silent

majority of IT spending, ASM today is the newest IT discipline. SMART Methodology: Best Practices in ASM SMART Methodology: The Only Authoritative Guide to Creating a Successful Applications Support and Maintenance Environment, details what amounts to the industry's first established best practices in supporting, maintaining and enhancing existing applications. Based on more than 25 years of research, development and implementation, SMART Methodology details practices including: The Continuous Lifecycle Methodology Application Taxonomy Benchmarks and Service Levels Support and Maintenance Tools Support and Maintenance Maturity Levels Governance and Change Control Reporting and Documentation Corporate Culture For more information about RIS, please go to www.risglobal.com Rave Reviews for SMART Methodology "The industry has been in need of a book like SMART Methodology for years" "Finally a detailed, thorough and established set of best

Firefighters are called on to rescue people and protect property under serious and hazardous conditions. Some 100 firefighters die each year on duty, and another 95,000 are injured. Recommendations developed through the National Institute for Occupational Safety and Health (NIOSH) Fire Fighter Fatality Investigation and Prevention Program (FFFIPP) point to many safety practices that could improve

the health and safety of the nation's firefighters. The purpose of this report is to summarize the findings of a recent evaluation of the FFFIPP. Based on a national survey of fire departments and focus groups with frontline firefighters, the evaluation focused on firefighters' awareness of FFFIPP recommendations, the extent to which recommendations are being implemented, the factors affecting implementation, and NIOSH's dissemination practices. We learned that most fire departments are aware of the FFFIPP and follow its recommendations; nevertheless, various shortfalls, especially regarding cardiovascular health, motor vehicle safety, and procedures on the fireground, persist. The greatest shortfalls

exist in small and volunteer fire departments where resources limit the ability to purchase needed equipment and prepare firefighters to carry out their duties safely. We identified numerous specific improvements that NIOSH could make to promote health and safety.
