<p>nature of the English major in both non-Anglophone and Anglophone countries by addressing the tensions between language and literature pedagogy, the relevance of a focus on hyper-canonical Anglophone literature in a world of global Englishes, world literature, and multilingual students, and by reflecting on the necessary contingency and cross-purposes of blended literature and language classrooms. Many of the book's points of discussion arise from the author's experience as an English professor in Japan, where the particularities of English language and literature pedagogy raise significant challenges to Anglo-</p>	<p>centric critical and pedagogical assumptions. English Studies Beyond the 'Center': Teaching Literature and the Future of Global English therefore argues that English literature must make a case for itself by understanding its place in a newly configured discipline. Issues discussed in the book include: English language and literature pedagogy in Japan The modes through which EFL and English literary studies converge and diverge Globalized English beyond the Anglo-American perspective English classroom practices, particularly in Japan <u>Long Way Down</u> Simon and Schuster A collection of "commercial short stories F. This Side of Paradise is the debut novel by F. Scott Fitzgerald, published in 1920.

The book examines the lives and morality of post-World War I youth. Its protagonist Amory Blaine is an attractive student at Princeton University who dabbles in literature. The novel explores the theme of love warped by greed and status seeking, and takes its title from a line of Rupert Brooke's poem *Tiara Tahiti*. The novel famously helped F. Scott Fitzgerald gain Zelda Sayre's hand in

Gatsby's mansion on Long Island blazes with light, and the beautiful, the wealthy, and the famous drive out from New York to drink Gatsby's champagne and to party all night long. But Jay Gatsby, the owner of all this wealth, wants only one thing - to find again the woman of

his dreams, the woman he has held in his heart and his memory for five long years. The Great Gatsby, F. Scott Fitzgerald's masterpiece, is one of the great American novels of the twentieth century. It captures perfectly the Jazz Age of the 1920s, and goes deep into the hollow heart of the American Dream.

Resources in education Houghton Mifflin Harcourt This open access book, inspired by the ICME 13 Thematic Afternoon on “European Didactic Traditions”, takes readers on a journey with mathematics education researchers, developers and educators in eighteen

countries, who reflect on their experiences with Realistic Mathematics Education (RME), the domain-specific instruction theory for mathematics education developed in the Netherlands since the late 1960s. Authors from outside the Netherlands discuss what aspects of RME appeal to them, their criticisms of RME and their past and current RME-based projects. It is clear that a particular approach to mathematics education cannot simply be transplanted to another country. As such, in eighteen chapters the authors describe how they have adapted RME to their individual circumstances and view on mathematics education, and tell their personal stories

about how RME has influenced their thinking on mathematics education.

abstract: A tendency  
in the realm of gender  
studies has been to  
mainly concern  
oneself with gender,  
whereas the same can  
be claimed in terms of  
class analysis showing  
a tendency towards  
primarily and

with class. This study  
tries to combine both  
fields in an attempt to  
not only expose how  
present forms of  
masculinity are  
established but also  
how these forms  
interact with  
‘ class ’ . In addition  
to Crenshaw ’ s  
‘ intersectionality ’

‘ interpersonal

between masculinity  
and ‘ class ’ will be  
scrutinized by means  
of two movie  
adaptations of "The

shown that factors such  
as social and

be identified as

these masculinities.

science and practice development of forensic science has undergone dramatic changes. Since the early 1960s the technological developments and their application to forensic science have been immense. Not only that, the application of science within a legal context and framework has developed enormously, as has the evaluation of the analytical results obtained. This unique text looks at the changes and challenges within forensic science over the last fifty years through a continuous diary of science and practice development witnessed by the editorials and relevant correspondence delivered through the UK Forensic Science Societies' journal Science and Justice (formally the Journal of the Forensic Science Society). The editorials are divided into sections relating to the developments of forensic practice, the advancement of science, education, legal aspects, forensic science and medicine, the international dimension of forensic science and the interpretation and evaluation of evidence. The text and first two sections are set in context by an introductory chapter written by Professor Brian Caddy examining the future of forensic science. • A key text that traces the historical development of forensic science through reflective editorials published in the journal Science and Justice, and the Journal of the Forensic Science Society • Includes introductory chapter by Professor Brian Caddy • Divided into themed sections to reflect
