Applied Linear Statistical Models 5e is the long established leading authoritative text and reference on statistical modeling. For students in most any discipline where statistical analysis or interpretation is used, ALSM serves as the standard work. The text includes brief introductory and review material, and then proceeds through regression and modeling for the first half, and through ANOVA and Experimental Design in the second half. All topics are presented in a precise and clear style supported with solved examples, numbered formulae, graphic illustrations, and "Notes" to provide depth and statistical accuracy and precision. Applications used within the text and the hallmark problems, exercises, and projects are drawn from virtually all disciplines and fields providing motivation for students in virtually any college. The Fifth edition provides an increased use of computing and graphical analysis throughout, without sacrificing concepts or rigor. In general, the 5e uses larger data sets in examples and exercises, and where methods can be automated within software without loss of understanding, it is so done.

Situational Judgment Tests advances the science and practice of SJTs by promoting a theoretical framework, providing an understanding of best practices, and establishing a research agenda for years to come. Currently, there is no other source that provides such a comprehensive treatment of situational judgment testing. Key features of this book include: chapters rich with theoretical insights and future research possibilities; numerous implications for improving the practical applications of SJTs, which include not only SJT development and scoring, but also operational issues affecting test administration and interpretation; comprehensive summaries of published and unpublished SJT research; and chapters that address topics that are timely and current, such as issues involving the international application of SJTs and technological considerations. This text is relevant for academics, practitioners, and students of human resource management, organizational behavior, management, and industrial/organizational psychology. This book is new in SIOP's Organizational Frontiers Series, publications of the Society of Industrial and Organizational Psychology.
