“ One of the great adventures of our time. ” —Life “ Am going to cross Pacific on a wooden raft to support a theory that the South Sea islands were peopled from Peru. Will you come? . . . Reply at once. ” That is how six brave and inquisitive men came to seek a dangerous path to test a scientific theory. On a primitive raft made of forty-foot balsa logs and named “ Kon-Tiki ” in honor of a legendary sun king, Thor Heyerdahl and five companions deliberately risked their lives to show that the ancient Peruvians could have made the 4,300-mile voyage to the Polynesian islands on a similar craft. For three months, the bold young men made their way across the pacific at the complete mercy of the ocean. They encountered storms that threatened to tear their raft apart, whales large enough to sink them in the blink of an eye, and sharks ready to feast on any man unfortunate enough to fall overboard. In the true spirit of adventure, they held on until finally making landfall on a remote Polynesian island,

proving Heyerdahl ' s theory possible after all. On every page of this true chronicle—from the actual building of the raft through all the dangerous and comic adventures on the sea, to the spectacular crash landing and the native islanders ' hula dances—each reader will find a wholesome and spellbinding escape from the twenty-first century.

Local Language Testing: Design, Implementation, and Development

describes the language testing practice that exists in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in the language testing and assessment literature.

Covering both theory and practice, the book focuses on the advantages of local tests, fosters and encourages their use, and provides suggested ideas for their development and maintenance. The authors include examples of operational tests with well-proven track records and discuss: the ability of local tests to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and research; local testing practices grounded in the theoretical principles of language testing, drawing from experiences with local testing and providing practical examples of local language tests, illustrating how they can be designed to effectively function within and across different institutional contexts; examples of how local language tests and assessments are developed for use within a specific context and how they serve a variety of purposes (e.g., entry-level proficiency testing, placement testing, international teaching assistant testing, writing assessment, and program evaluation). Aimed at language program directors, graduate students, and researchers involved in language program development and evaluation, this

is a timely book in that it focuses on the advantages of local tests, fosters and encourages their use, and outlines their development and maintenance. It constitutes essential reading for language program directors, graduate students, and researchers involved in language program development and evaluation.

Word lists lie at the heart of good vocabulary course design, the development of graded materials for extensive listening and extensive reading, research on vocabulary load, and vocabulary test development. This book has been written for vocabulary researchers and curriculum designers to describe the factors they need to consider when they create frequency-based word lists. These include the purpose for which the word list is to be used, the design of the corpus from which the list will be made, the unit of counting, and what should and should not be counted as words. The book draws on research to show the current state of knowledge of these factors and provides very practical guidelines for making word lists for language teaching and testing. The writer is well known for his work in the teaching and learning of vocabulary and in the creation of word lists and vocabulary size tests based on word lists.

Advanced Masterclass CAE Tests in Print (Buros)

This book advocates that teachers should play an active role in high-stakes language testing and that more weight should be given to teacher judgement.

---

This is likely to increase the formative potential of high-stakes tests and provide teachers with a sense of ownership. The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices. The book also considers the arguments against teacher involvement, e.g. the contention that teacher involvement might entrench the practice of teaching to the test, or that teachers should not be actively involved in high-stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts, the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high-stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover, teacher involvement empowers them to play a role in reforming high-stakes language testing so that it is more equitable and more likely to enhance classroom practices. High-stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers, which ultimately benefits all their students.

#### A Practical Approach Cambridge University Press

Second language (L2) fluency is an exciting and fast-moving field of research, with clear practical applications in language teaching. This book provides a lively overview of the current advances in the field of L2 fluency, and connects the theory to practice, presenting a hands-on approach to using fluency research across a range of different language-related professions. The authors introduce an innovative multidisciplinary perspective, which brings together research into cognitive and social factors, to understand fluency as a dynamic variable in language performance, connecting learner-internal factors

---

such as speech processing and automaticity, to external factors such as task demands, language testing, and pragmatic interactional demands in communication. Bringing a much-needed multidisciplinary and novel approach to understanding the complex nature of L2 speech fluency, this book provides researchers, students and language professionals with both the theoretical insights and practical tools required to understand and research how fluency in a second language develops.
