topic that dominates  
the Reasoning Section  
of all sorts of banking  
exams. So many other  
miscellaneous topics

too are now being asked  
in the form of puzzles.  
The number of  
questions being asked  
on puzzles ranges from  
60 to 65 percent of the

modern world? Through much of human history, societal control was determined by militaristic strength. Individuals and tribes fought to control vital resources and land. In the next part of evolution marked by colonialism and the emergence of mega-corporations, money determined power. In the recent decade, the key to supremacy has shifted again. The power and control individuals, leaders and nations have is now determined by their ability to mould the information environment. In *The Art of Conjuring Alternate Realities*, Shivam Shankar Singh and Anand Venkatanarayanan dive into the operations of political parties, cyber criminals, godmen, nation states and intelligence agencies from around the world to explain how the power to manipulate your thoughts is being harnessed, and how information warfare is shaping your life and world.

This is the story of the carefully planned resurgence of the State Bank of India (SBI) from a laid-back incumbent under threat from private players to a customer-oriented competitive organization that has outperformed rivals despite several constraints. The

leadership at SBI succeeded in reshaping perspectives and profitability at the bank, which employs a staggering 200,000 people, not withstanding salary restrictions and regulatory bottlenecks. While the primary thrust was on changing employee attitude towards their own organization and, of course, its customers, the transformation exercise was broad-based encompassing fundamental changes in technology, processes and business-mix alike. In about three years beginning 2006, SBI not only defended its own lair against the siege of younger, leaner, meaner rivals but actually took the battle to the attacker ' domains. SBI ' s size and setting make the story an inspiring example to other organizations, particularly in the public
