IT industry offers lucrative job opportunities not only for the IT graduates but also for all those non-IT background students who thrive to build their career in this field. This book, now in its second edition, apprises the reader with every minute detail of the IT concepts and serves as a self-help guide for the graduates and students appearing for their placement tests and interviews in the final year. The book begins with the details of recruitment process and focuses on tackling difficult HR interview questions, resume building tips and provides sample resume which will equip the students for the interviews and hone their overall personality. The testimonials by the industry experts and academicians succinctly tell about the expectations of industry employers from the new recruits. The text in the middle chapters elaborates the programming concepts of C, C++ and Java as well as the concepts related to database, software engineering, operating systems, networking and DOT NET in great detail. The last chapter of the book presents a number of topics relating to general computer science aptitude. NEW TO THE SECOND EDITION • Numerous sections and examples have been included in chapters on OOP Concepts—Classes and Objects, Inheritance in C++, Polymorphism, Exception Handling and Templates in C++ and Operating System Concepts. • Completely revamped text in the chapter on Database Concepts. • Several MCQs from the latest interviews have now been incorporated into the respective chapters. • Five sample test papers with solutions are provided for practice. KEY FEATURES • Includes questions gathered from the interviews conducted by companies such as Virtusa, TCS, IBM, DELL, HCL, Aon Hewitt, Convergys, CSC and Wipro. • Serves as a complete guide containing basic programming concepts helpful for non-IT background students as well. REVIEWER'S COMMENT It was a dream come true for me when I got placed in CISCO SYSTEMS with a package of 10.7 lakhs. I am immensely thankful to Ela Kashyap for writing such an amazing book. It has all the requisite information required to crack any interview, as it succinctly covers all the important topics one needs to know for IT interviews. The book has helped me to crack five rounds of interview. So, I would like to recommend this book to all the engineering students.

Want to graduate with a job in hand? Then this book is for you. The number of engineering graduates passing out every year is at least 50% more than the number of jobs available. Also, 90% of these graduates are not job-ready. Your Placement team can only help bring companies to your campus. It is your responsibility to prepare yourself to get a good job. The onus is on you. The earlier you start preparing, the better. Written in simple language, it contains clear steps for you to work on during your time in college. Based on his experience of recruiting several thousand students from engineering colleges, Gokul Santhanam gives you proven tips to help you graduate with a job in hand. An excellent, pragmatic guide for students in the "cusp generation" of these challenging times. This book is a timely assist, and a must-read for those in the middle of it all: one leg in campus and the other, seeking a good job. - Satish Pradhan, Ex-Head of Group HR, Tata Group

This book has been designed by combining the goodness of the original Wren & Martin text, High School Grammar & Composition, and specialized content developed by a panel of competitive examination experts in the area of the English language. The USP is therefore adapting a classical text to the needs of the various admission and recruitment competitive examination aspirants. Its exhaustive coverage ensures that virtually no competitive examination remains untouched. Students preparing for descriptive tests such as UPSC (Compulsory English and General English Papers of Main Exams) and state PCS examinations, Judicial Services examination, Indian Forest Service examination, Statistical Services and many other examinations in which subjective papers/tests are mandatory will find this book immensely useful. The book is also a boon for those students who are preparing for objective tests such as Banking and Insurance, SSC, UPSC preliminary, Defence Services, Law entrance, Business School

entrance examinations, and many other admission and recruitment examinations. A unique feature of this General Register book is demonstration of the connectedness of the concepts and their applications visually, with the help of arrows and pointers. The aspirant will also find questions from recent examinations on virtually every page of the book. An index of examination-wise questions has been included so that the aspirant can choose the sections according to the targeted examination and focus more. Topic-wise distribution of questions in English examination papers - both descriptive and objective - will also help aspirants to undertake a very well directed test-prep program using the book.

This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22 – 24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc

'Will Maya get a campus placement' revolves around Maya, who is talented but unlucky in getting a job from Campus. To her surprise, she finds that Vainateya has two backlogs and still grabs an offer from Campus. Then there is Akash who appears in the placement process just because he has nothing else to do on that particular day, and even he gets through. She fails to understand why her strengths are not sufficient to secure her a job. Why is she not able to arrive at the pith of her weakness and work on it? Until Kinni gives her a direction – the puny push. Will Kinni's small help motivate her to change her attitude? Is it right to say that – 'If everything is not fine in the end, then it is not the end?'
