Practice makes permanent: 300+ questions for AQA GCSE Biology HarperCollins UK

Nail your A2 EMPA. I have taught, marked and moderated A-level ISAs and EMPAs for AQA and from this written the only specific guide for this exam. With my knowledge of common mistakes and mark schemes I am sure that this is an effective and comprehensive guide to the hardest parts of the process - experimental design and statistics. Most students seem to get themselves in knots, mainly because their teachers don't really understand it. By reading and understanding the theory, following the worked examples and finally completing the exam style questions, you will be doing everything you can to get your best mark in the exam. As with all exams the same questions keep coming up. Make sure you know what they are AND how to answer them. What this book is: An educational resources reviewing the use of statistics and the three statistical tests you need to be familiar with for your EMPA. Exam style questions on experimental design with exemplar answers based on previous mark schemes. It clearly walks through when each statistical test is used, includes worked examples and then an exam style question with a following mark scheme based on previous past papers. It comprehensively and thoroughly sets you up for task 1 and 2 as well as section A of the written paper. It also gives some insight into the style of questions in section B. What it is not: Written based on having seen this coming year's exam. This is not cheating!
