A Catalyst for Shared Prosperity? World Bank Publications

Income inequality has increased considerably in the aftermath of the financial crisis of 2007 † “ 08 to the extent that one percent of global population possess almost half of the global assets. Whereas the development community is unanimous to tackle growing inequality and imbalance in the distribution of wealth, there is a difference of opinion as to the approaches to achieve this goal. This report presents a perspective from Islamic finance on how shared prosperity can be enhanced. The theoretical framework for economic development by Islamic economics and finance is based on four fundamental pillars: (i) an institutional framework and public policy oriented to the development objectives of Islam; (ii) prudent governance and

accountable leadership; (iii) promotion of the economic and financial system based on risk sharing; and (iv) financial and social inclusion for all, promoting development, growth, and shared prosperity. There is evidence that Islamic finance is experiencing high growth with the banking sector leading the way. Several countries are working seriously towards developing standards, regulation and legal frameworks for the development of Islamic finance. However, there are a number of aspects where policy interventions or improvements in policy effectiveness are needed to develop Islamic finance to promote shared prosperity. Without the enabling environment, Islamic finance may not be able to attain the potential expected of it. With adequate policy interventions and enabling financial infrastructure, Islamic finance could become a catalyst for alleviating poverty and inclusive prosperity.

Although the Common Core and C3 Framework highlight literacy and inquiry as central goals for social studies, they do not offer guidelines, assessments, or curriculum resources. This practical guide presents six research-tested historical investigations along with all corresponding teaching materials and tools that have improved the historical thinking and argumentative writing of academically diverse students. Each investigation integrates reading, analysis, planning, composing, and reflection into a writing process that results in an

argumentative history essay. Primary sources have been modified to allow struggling readers access to the material. Web links to original unmodified primary sources are also provided, along with other sources to extend investigations. The authors include sample student essays from each investigation to illustrate the progress of two different learners and explain how to support students' development. Each chapter includes these helpful sections: Historical Background, Literacy Practices Students Will Learn, How to Teach This Investigation, How Might Students Respond?, Student Writing and Teacher Feedback, Lesson Plans and Materials. Book Features: Integrates literacy and inquiry with core U.S. history topics. Emphasizes argumentative writing, a key requirement of the Common Core. Offers explicit guidance for instruction with classroom-ready materials. Provides primary sources for differentiated instruction. Explains a curriculum appropriate for students who struggle with reading, as well as more advanced readers. Models how to transition over time from more explicit instruction to teacher coaching and greater student independence.

"The tools this book provides—from graphic organizers, to lesson plans, to the accompanying documents—demystify the writing process and offer a sequenced path toward attaining proficiency." —From the Foreword by Sam Wineburg, co-author of *Reading Like a Historian* "Assuming literate

practice to be at the core of history learning and historical practice, the authors provide actual units of history instruction that can be immediately applied to classroom teaching. These units make visible how a cognitive apprenticeship approach enhances history and historical literacy learning and ensure a supported transition to teaching history in accordance with Common Core State Standards." —Elizabeth Moje, Arthur F. Thurnau Professor, School of Education, University of Michigan

"The C3 Framework for Social Studies State Standards and the Common Core State Standards challenge students to investigate complex ideas, think critically, and apply knowledge in real world settings. This extraordinary book provides tried-and-true practical tools and step-by-step directions for social studies to meet these goals and prepare students for college, career, and civic life in the 21st century." —Michelle M. Herczog, president, National Council for the Social Studies

In DNA Cloning and Assembly Methods, expert researchers in the field detail many of the

methods which are now commonly used for DNA cloning and make cloning procedures faster, more reliable and also suitable for high-throughput handling. These include methods and protocols that are based on several mechanisms including type II and IIS restriction enzymes, single stranded annealing, sequence overlap, and recombination. With additional chapters on software programs that are suitable for primer design, a feature crucial for the functionality of the described methods. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and key tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, DNA Cloning and Assembly Methods seeks to provide scientist with a valuable and useful resource for wet lab researchers within life sciences.
