Birth to Big School Springer  
The rediscovery of the value  
of apprenticeships has been  
one of the most significant

---

trends in vocational education in recent years, and has prompted an array of research and development projects in countries around the world. In this volume, the renewed interest in the apprenticeship tradition and the various steps towards the implementation of innovative apprenticeship programmes are analysed and discussed from different perspectives. Beginning with a number of chapters that describe recent developments in apprenticeship training in different national contexts,

the book moves on to analyze the way in which both the quality and profitability of apprenticeship act in concert as the most influential drivers of innovation in this field. In sum, this book makes an important contribution to the international literature on apprenticeship. It draws together some of the leading researchers in the area, and with its overview of a number of national Vocational Education and Training (VET) projects, provides a body of knowledge on current

practices and issues that has previously been lacking in this complex interdisciplinary field. The lessons learned from countries' experiences, as presented in this book, provide a valuable platform for policy-makers and scholars alike.

Global Report on Adult Learning and Education Springer  
Librarians must now work at a different level from that required 20 years ago, but the training available is not always appropriate or accessible to all. The authors of this volume have responded to this significant and continuing change within the profession by offering a much-needed guide to best

practice for staff training and development in library and information work. This handbook addresses new aspects of service provision both in the UK and abroad, and provides an up-to-date review of the current developments that are becoming increasingly important to librarians through the influence of the electronic age and the widening of areas of professional involvement. The Handbook of Library Training Practice and Development will be invaluable to those responsible for the development of staff and line managers as well as providing a crucial insight into the information profession for anyone new to this career path or looking to develop their knowledge within it.

THE BIBLE TELLS THE STORY OF NOAH'S ARK .

---

. . THIS IS THE STORY OF THE PEOPLE WHO LIVED IT. A plot by a rival to kill Noah and his family is thwarted by a beautiful young woman, who joins them as they flee the ancient Biblical city of Eden. Meanwhile, the author of the plot wrests control of the city from Noah's father and succeeds in turning the hearts of its citizens away from God. One year later, the Lord reveals His plan to destroy the earth by flood and commands Noah to build an ark. Only the news is met

with skepticism and opposition from members of his own family. Eventually, word of the ark reaches Eden, prompting the rival to send an army of five thousand men to destroy it. However, Noah has an army of his own. Action, adventure, and suspense combine with the Biblical account of Noah's Ark to create a heart-pounding page-turner that will stay with you long after the flood waters have receded.

*Rediscovering Apprenticeship*  
Cengage AU

This book draws on experiences from a range of vocational education systems in different nation states and re-examines the purpose of providing experiences outside educational institutions; the kinds and extent of those experiences; and efforts made to ensure the integration of students' experiences across sites. Analyses of the various vocational education systems, their purposes and practices across nations, and challenges experienced by different stakeholders illustrate different approaches to the integration of learning at different sites. The book includes a consideration of what constitutes the integration and reconciliation of experiences, and their attendant

---

educational implications. This extends an appraisal of the concepts of integration, reconciliation, curriculum and work readiness, each of which has a range of connotations. Integration or reconciliation is differentiated from transfer of learning, which is commonly based on simple assumptions that the educational institutions will provide theory and that the workplaces will provide practice from the workplaces, and that the two can be easily linked by students. The contributions from different nation states clearly demonstrate that integration is a collaborative process and requires the agency of stakeholders operating at global, national and

specific learning site levels. Handbook of Library Training Practice and Development Pearson  
The National School Improvement Tool brings together findings from international research into the practices of highly effective schools and school leaders. The Tool assists schools to review and reflect on their efforts to improve the quality of classroom teaching and learning. It supports school-wide conversations - including with parents and families, school governing bodies, local communities and students themselves - about aspects of current practice, areas for improvement and evidence that

progress is being made. The Tool does not describe everything that effective schools do, but focuses on those practices that are most directly related to school-wide improvements, and thus outcomes for students. In this sense, the tool can be thought of as a core element of more comprehensive school improvement programs, frameworks and initiatives.

Policy makers recognize that developing capacity for knowledge and technology driven growth is necessary for Swaziland to integrate into the global economy and to be competitive; in particular because Swaziland is not rich in exploitable natural resources. The Education Training and Skills Development Sector (ETSDS), the educational sector of Swaziland s long-term development and reform program, covers all levels of education, from early childhood to post-secondary education. This paper evaluates the adequacy of the ETSDS in light of the

---

enhanced educational goal for the country. Acknowledging that financing reforms will be a challenge, this paper makes recommendations to enhance the program's effectiveness, such as expanding access, strengthening delivery modes, and minimizing financial barriers to education and training.

**VET in Schools** Springer Science & Business Media Professionalism is arguably more important in some occupations than in others. It is vital in some because of the life and death decisions that must be made, for example in medicine. In

others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation. The core idea behind this book is that Information and Communication Technology (ICT) is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind. *Business of Childcare* Organization for Economic Co-

Operation & Development Birth to Big School is designed to support the Certificate III in Early Childhood Education and Care in a holistic and integrated way while addressing the relevant units of the Training Package, and mapping is available to link content to units. The text emphasises the importance of knowing the traditional domains of development and links them to the Early Years Learning Framework (EYLF) and the National Quality Standards (NQS) by using down-to-earth practical examples. Questions enable

education and training (TVET) with particular reference to achieving inclusive growth and the greening of economies. Underlying the increasing pressure for new models of TVET provision is the rapid pace of technological change, demand for a work force which is highly responsive to evolving needs and a transforming market place that calls for higher order skills and lifelong learning. The book proposes a re-engineered, modernized TVET system that fosters an innovative approach which enhances the employability of workers as well as the

sustainability of their livelihoods. The book includes contributions from leading policy makers, researchers, and practitioners, including those in the private sector in analyzing and forecasting the most urgent priorities in skills development. The book argues for creative approaches to TVET design and delivery particularly with a view to improve job prospects , and meeting the goals of inclusion, sustainable development and social cohesion. Addressing issues such as the chronic mismatches between skills acquired and actual skills required in the

---

work place, the volume proposes diversified approaches towards workforce development and partnerships with the private sector to improve the quality and relevance of skills development. The new imperatives created by 'greening' economies and responses required in skills development and training are addressed. Developing TVET is a high priority for governments in the Asia Pacific region as they seek to achieve long-term sustainable growth since the continued success of their economic destinies depend on it. The volume also includes an

emerging framework for skills development for inclusive and sustainable growth in the Asia and Pacific region.
