Jigs and Tooling for AR-15 80% Lower Receivers For aluminum 80% lower receivers, tooling and a jig are required to complete the receiver. While polymer 80% lower receivers often times include a single-use jig that can be completed on a drill press, a proper lower receiver completion jig makes the process much faster, easier, and provides better results.

How AR-type 80% Jigs Work. All AR-type jigs (whether you're building an AR-15, AR9, or AR-10 in aluminum or polymer) work the same: Two side plates secure the 80% lower and various top plates provide the cutting templates for cutting out the fire control cavity for the trigger, hammer, sear, disconnecter, safety lever, and springs.
