Documentation | Documentation - ArcGIS

For detailed information on setting up ArcGIS Online, see the ArcGIS Online Implementation Guide. You won't need to read the entire guide – just follow the steps outlined in the Activate your subscription (page 4) and Add members (page 8) sections. Your main use for ArcGIS Online will be to manage ArcGIS Pro licenses.

The ArcGIS API for Python is a

powerful, modern and easy to use Pythonic library to perform GIS visualization and analysis, spatial data management and GIS system administration tasks that can run both in an interactive fashion, as well as using scripts. It enables power users, system administrators and developers to leverage the rich SciPy ecosystem for automating their workflows and performing repetitive tasks using scripts.

In ArcGIS, Python scripting can be

used for automating tasks (through
running Python scripts), as well as
writing applications, such as add-ins.
This guide focuses on Python scripting
as Python programming is more
complex and takes more time to learn –
for now, we´re good with learning
Python scripting.
