Plato's frontal attack on poetry has always been a problem for sympathetic students, who have often minimized or avoided it. Beginning with the premise that the attack must be taken seriously, Eric Havelock shows that Plato's hostility is explained by the continued domination of the poetic tradition in contemporary Greek thought. The reason for the dominance of this tradition was technological. In a nonliterate culture, stored experience necessary to cultural stability had to be preserved as poetry in order to be memorized. Plato attacks poets, particularly Homer, as the sole source of Greek moral and technical instruction-Mr. Havelock shows how the Iliad acted as an oral encyclopedia. Under the label of mimesis, Plato condemns the poetic process of emotional identification and the necessity of presenting content as a series of specific images in a continued narrative. The second part of the book discusses the Platonic Forms as an aspect of an increasingly rational culture. Literate Greece demanded, instead of poetic discourse, a vocabulary and a sentence structure both abstract and explicit in which experience could be described normatively and analytically: in short a language of ethics and science.

This detailed exegetical study of Gal 3.28c in the light of 3.14-29 and 4.21-31 shows not only how integral this verse is to chapters 3 and 4 of the letter, but also that it is the key to understanding Paul's theological argument of promise in Galatians. Paul's use of the story of Abraham in 3.14-29 and of Sarah in 4.21-31 in light of God's promise to the patriarch and the matriarch in Genesis 17 have implications displays the joint role of Abraham and Sarah in bringing about the promise, and underscores the unity of the believers in Christ. In light of this, Uzukwu examines important aspects of the history of the interpretation of Gal 3.28c. Uzukwu sheds light on the link between Gal 3:28 and the three expressions of gratitude found in Greek writings. Links are also revealed to the three blessings of gratitude that appear at the beginning of the Jewish cycle of morning prayers, Gen 1.27c (in the Septuagint), and the alleged pre-Pauline baptismal formula. She goes further to demonstrate how 3.28c is related to the unity of Galatians 3-4, focusing on the theme of the promise as the text discusses the effect of the Christ event in bringing about the fulfillment of that promise.

Caroline Myss, author of the New York Times bestsellers Anatomy of the Spirit and Why People Don ' t Heal and How They Can, presents an exciting, highly original program in this long-awaited book. Based on her internationally popular workshop of the same name, Sacred Contracts is a brilliant synthesis of psychology, healing guidance, and spiritual insight. As a medical intuitive, Myss has found that people often don ' t understand their purpose in life, which has led to a spiritual malaise of epidemic proportions. This metaphysical disease in turn leads to depression, anxiety, fatigue, and eventually physical illness. But our purpose—our individual Sacred Contract—is often difficult to apprehend. For this reason, Myss developed an enjoyable and ingenious process for deciphering your own Contract using a new theory of archetypes that builds on the works of Jung, Plato, and contemporary thinkers. She first recounts how the concept of Sacred Contracts took form in myths and other cultural traditions through the ages. She then examines the lives of the spiritual masters and prophets—Abraham, Jesus, the Buddha, and Muhammad—whose archetypal journeys illustrate the four stages of a Sacred Contract and provide clues for discovering your own. With her signature motivational style and stories, Myss explains how you can identify your particular spiritual energies, or archetypes—the gatekeepers of your higher purpose—and use them to help you find out what you are here on earth to learn and whom you are meant to meet. In coming to know your archetypal companions, you also begin to see how to live your life in ways that make the best use of your personal power and lead you to fulfill your greatest—in fact, your divine—potential. In this process, you learn how to see your life—and the lives of others—symbolically, allowing you to manage your personal power without getting caught up in emotional drama. You will also learn how to fulfill your Sacred Contract: what you and only you are here on earth to do. Finally, Myss offers specific guidance for locating your physical and emotional vulnerabilities and healing any susceptible areas. Both visionary and practical, Sacred Contracts is a completely unique process of self-discovery and spiritual archaeology and a bold, powerful work of spiritual wisdom.

The Epistemic Innocence of Irrational Beliefs Springer Science & Business Media

The human soul is described in the esoteric tradition as a twelve-petalled lotus. This book introduces the zodiac as the twelvefold prototype of the soul, and the signs as twelve types of soul consciousness and human experience. The mirroring of zodiac and soul opens a field of reciprocal illumination between astrological archetypes and philosophical worldviews. This mutual revelation is what the author pursues in the spiritual imagination and life experience of three thinkers: the philosopher Heidegger, the mystic scientist Teilhard de Chardin and the leader Eisenhower. Emerging from their lifeworks, conceptual constellations flesh out a zodiacal signature dominant in their natal sky, offering unique insights into the soul of the sign and the inner sky of the human mind. The experience of the World Wars, vital for the three thinkers, precipitates the archetypal exploration on the historical stage and reveals the remarkable relevance of the theme of soul to our times, as it unveils the inner side of the world events of the last hundred years: the birth of a planetary self. Drawing upon Western and Eastern sources of wisdom, mythology and alchemy, this book brings forth a comprehensive grasp of the nature and evolution of the human soul, from its birth on the earth to its achieved fullness in the great representatives of humankind.

In an ideal world, our beliefs would satisfy norms of truth and rationality, as well as foster the acquisition, retention, and use of other relevant information. In reality, we have limited cognitive capacities and are subject to motivational biases on an everyday basis. We may also experience impairments in perception, memory, learning, and reasoning in the course of our lives. Such limitations and impairments give rise to distorted memory beliefs, confabulated explanations, and beliefs that are elaborated delusional, motivated delusional, or optimistically biased. In this book, Lisa Bortolotti argues that some irrational beliefs qualify as epistemically innocent, where, in some contexts, the adoption, maintenance, or reporting of the beliefs delivers significant epistemic benefits that could not be easily attained otherwise. Epistemic innocence does not imply that the epistemic benefits of the irrational belief outweigh its epistemic costs, yet it clarifies the relationship between the epistemic and psychological effects of irrational beliefs on agency. It is misleading to assume that epistemic rationality and psychological adaptiveness always go hand-in-hand, but also that there is a straight-forward

trade-off between them. Rather, epistemic irrationality can lead to psychological adaptiveness, which in turn can support the attainment of epistemic goals. Recognising the circumstances in which irrational beliefs enhance or restore epistemic performance informs our mutual interactions and enables us to take measures to reduce their irrationality without undermining the conditions for epistemic success.
