Globalization has created an interconnected world, but has not diminished

violence and militarism. The Economics of Killing describes how the power of global elites, entrenched under globalization, has created a deadly cycle of violence. In this groundbreaking work, Vijay Mehta shows how attempts at peaceful national development are routinely blocked by Western powers. He centers the 2008 financial crisis in US attempts to block China's model of development. He shows how Europe and the US conspire with regional dictators to prevent countries from developing advanced industries, and how this system has fed terrorism. Mehata argues that a different world is possible, based on policies of

disarmament, demilitarization, and sustainable development. This original and thought-provoking book will be of great interest to anyone concerned about the consequences of endless war fueled by the West.

“ More people recognize the importance of Allyship—and that ’ s great. Unfortunately, many men still don ’ t know what they need to do to effect change so everyone feels valued and empowered at work. In Showing Up, Ray Arata provides clear guidance on how to turn good

intentions into action. I strongly recommend it to everyone interested in helping create a more equal and productive workplace. ” —Sheryl Sandberg, COO of Facebook and founder of LeanIn.Org and OptionB.Org

Showing Up is a revolutionary step-by-step guide—by and for men—to end toxic masculinity and enact heart-based leadership, increase diversity, bolster the bottom line, and create a workplace culture where everyone wins. The Time’s Up, Me Too, and Black Lives Matter movements have sounded a wake-up—especially for men. Organizations worldwide now realize the critical importance of diversity, equity, and inclusion (DEI) for underrepresented people. It ’ s abundantly clear: the default model of masculinity isn ’ t working for anyone. But for a new and healthier infrastructure, for permanent and transformational shifts, we need a plan that includes men. In Showing Up, Ray Arata details the proven methods he’s shared with such companies as Verizon, Bloomberg, Moody’s, Intel, Toyota, Hearst, and more,

teaching men to

- Embrace healthy masculinity as a cornerstone of inclusionary leadership;
- Identify unhealthy masculine behaviors in the workplace—like mansplaining, maninterrupting, and manopolizing;
- Adopt behavior modifications aligned with being an inclusive leader and ally;
- Incorporate specific language to use in healthy discussions; and
- Leverage power and position to elevate underrepresented groups.

The Future of Technology
Oxford University Press
From the industrial revolution to the railway age, through the era of electrification, the advent of mass production, and finally to the information age, the same pattern keeps repeating itself. An exciting, vibrant phase of innovation and financial speculation is followed by a crash, after which begins a longer, more stately period during which the technology is actually deployed properly. This collection of surveys and articles from The Economist examines how far technology has come and where it is heading. Part one looks at topics such as the

“ greying ” (maturing) of IT, phones. Part three considers the growing importance of security, the rise of outsourcing, and the challenge of complexity, all of which have more to do with implementation than innovation. Part two looks at the shift from corporate computing towards consumer technology, whereby new technologies now appear first in consumer gadgets such as mobile phones. Topics covered will include the emergence of the mobile phone as the “ digital Swiss Army knife ” ; the rise of digital cameras, which now outsell film-based ones; the growing size and importance of the games industry and its ever-closer links with other more traditional parts of the entertainment industry; and the social impact of technologies such as text messaging, Wi-Fi, and camera

which technology will lead the next great phase of technological disruption and focuses on biotechnology, energy technology, and nanotechnology.
