Reoperative Hand Surgery is a major contribution to the literature, offering a wide range of reoperative options for challenging problems that face the reconstructive hand surgeon after failed primary surgery. Concise and discussing all of the more common issues that hand surgeons often face in performing revision surgery, this invaluable title is unique in that it looks specifically at the problem of what to do when the original index procedure did not go as planned. Topics covered include the hand, wrist, forearm and elbow, and several sections of the book discuss some of the psychological and social factors that also go into the decision process to reoperate or not. The chapters are tightly focused so that the important aspects to consider for reoperation can be quickly reviewed. There is also a component that discusses how to avoid other pitfalls and to minimize as well as manage any complications that may occur with reoperative procedures. Importantly, the book is replete with original art work to help describe and demonstrate how to perform many reoperative procedures. The artwork is simple and straightforward but yet detailed enough to convey the important steps and aspects for the surgical intervention it is outlining. Developed by renowned experts in the hand surgery field, Reoperative Hand Surgery is an indispensable, state-of-the-art reference, offering the busy hand and upper extremity surgeon easily accessible information relating to the evaluation, diagnosis, and possible surgical interventions for the diagnoses discussed.

The Survivalist tells the life story of author Larry Hager. In 1939, his family moved from Kansas to Idaho, and then to Oregon. Twelve years later they moved to a small logging community in southern Oregon and a whole new life for a little farm boy. Larry encountered a lot of interesting moments as a young man that he would have been far better off avoiding. Eventually, he wound up in the penitentiary as a result of one of these incidents. At first, however, he did not take his incarceration seriously. When he finally realized how serious the situation was, he started doing things with his life much differently. He has been a sailor, a logger, and a head saw filer in mills across the Northwest for the last 30 years. He has written songs and poetry, exploring the process of creative writing. Now he tells his story. The Survivalist takes an in-depth look at the life and times of Larry Hager. After all of the ups and downs, he finally got it right!

State and tribal governments have common purposes: to use public resources effectively and efficiently, to provide comprehensive services to their respective citizens, and to protect the natural environment, all while sustaining healthy economies. Neighboring governments, as a practical matter, share many aspects of their respective economic and social systems, and are connected through political and legal relationships. Although these mutual interests have created jurisdictional disputes that historically have been solved through litigation, there is an increasing need for cooperation. Public resources are an issue for all governments, and state and tribes can benefit by collaborating and pooling resources to the fullest extent possible.
