Fifty Key Thinkers on the Environment Vintage

Moving from fable and historical fiction to contemporary realism, this book of stories from Barry Lopez is erotic and wise, full of irresistible

characters doing things they shouldn't do for reasons that are mysterious and irreducible. In "The Letters of Heaven," a packet of recently discovered 17th-century Peruvian love letters presents a 20th-century man with the paralyzing choice of either protecting or exposing their stunning secret. When some young boys on the lookout for easy money get caught with a truckload of stolen horses, thievery quickly turns into redemption. For a group of convicts, a gathering of birds in the prison yard may be the key to transcendence, both figurative and literal. And, with the title story, Lopez enters a territory of unmitigated evil reminiscent of Conrad. Here are saints who shouldn't touch, but do; sinners who insist on the life of the spirit; a postcard paradise that turns into nightmare. Light Action in the Caribbean has already been hailed by Russell Banks as "tough-minded, emotionally turbulent, and always intelligent." E. Annie Proulx describes these stories as "subtle and mysterious" and says that a reader "cannot leave Lopez's fictional territory unchanged." This is a book that breaks exciting new ground for Barry Lopez.

Embrace Fearlessly the Burning World Andrews McMeel Publishing

In 1987, the United Nations created a vision for our common future: one Earth, where we could all live together without damaging the planet for future generations. In this short-fiction anthology from 2017, ten authors look another thirty years into the future, giving their perspectives regarding how we might-or might not-adapt to the changes around us in the year 2047. As citizens on this blue planet of ours, we are currently experiencing great changes when it comes to global warming, pollution, and toxic substances that end up in our food and our drinking water. In addition, flora and fauna are disappearing from the places where we played when we were children, and natural resources are being depleted around the world. Life as we know it is changing. Some say these changes are happening faster than ever, which means we need to adapt faster too. So are we? Read more on the book's webpage <http://2047ourcommonfuture.com>

Resistance Mountaineers Books

Humanity can make short work of the oceans' creatures. In 1741, hungry explorers discovered herds of Steller's sea cow in the Bering Strait, and in less than thirty years, the amiable beast had been harpooned into extinction. It's a classic story, but a key fact is often omitted. Bering Island was the last redoubt of a species that had been decimated by hunting and habitat loss years before the explorers set sail. As Callum M. Roberts reveals in *The Unnatural History of the Sea*, the oceans' bounty didn't disappear overnight. While today's fishing industry is ruthlessly efficient, intense exploitation began not in the modern era, or even with the dawn of industrialization, but in the eleventh century in medieval Europe. Roberts explores this long and colorful history of commercial fishing, taking readers around the world and through the centuries to witness the transformation of the seas. Drawing on firsthand accounts of early explorers, pirates, merchants, fishers, and travelers, the book recreates the oceans of the past: waters teeming with whales, sea lions, sea otters, turtles, and giant fish. The abundance of marine life described by fifteenth century seafarers is almost unimaginable today, but Roberts both brings it alive and artfully traces its depletion. Collapsing fisheries, he shows, are simply the latest chapter in a long history of unfettered commercialization of the seas. The story does not end with an empty ocean. Instead, Roberts describes how we might restore the splendor and prosperity of the seas through smarter management of our resources and some simple restraint. From the coasts of Florida to New Zealand, marine reserves have fostered spectacular recovery of plants and animals to levels not seen in a century. They prove that history need not repeat itself: we can leave the oceans richer than we found them.

True North: Travels in Arctic Europe Island Press

The acclaimed National Book Award winner gives us a collection of spellbinding new essays that, read together, form a jigsaw-puzzle portrait of an extraordinary man. With the publication of his best-selling *Of Wolves and Men*, and with the astonishing originality of *Arctic Dreams*, Barry Lopez established himself as that rare writer whose every book is an event, for both critics and his devoted readership. Now, in *About This Life*, he takes us on a literal and figurative journey across the terrain of autobiography, assembling essays of great wisdom and insight.

Here is far-flung travel (the beauty of remote Hokkaido Island, the over-explored Galápagos, enigmatic Bonaire); a naturalist's contention (Why does our society inevitably strip political power from people with intimate knowledge of the land small-scale farmers, Native Americans, Eskimos, cowboys?); and pure adventure (a dizzying series of around-the-world journeys with air freight everything from penguins to pianos). And here, too, are seven exquisite memory pieces hauntingly lyrical yet unsentimental recollections that represent Lopez's most personal work to date, and which will be read as classics of the personal essay for years to come. In writing about nature and people from around the world, by exploring the questions of our age, and, above all, by sharing a new openness about himself, Barry Lopez gives us a book that is at once vastly erudite yet intimate: a magically written and provocative work by a major American writer at the top of his form.

Embrace Fearlessly the Burning World University of New Mexico Press
From the National Book Award-winning author of *Arctic Dreams*, a highly charged, stunningly original work of fiction—a passionate response to the changes shaping our country today. In nine fictional testimonies, men and women who have resisted the mainstream and who are now suddenly “parties of interest” to the government tell their stories. A young woman in Buenos Aires watches bitterly as her family dissolves in betrayal and illness, but chooses to seek a new understanding of compassion rather than revenge. A carpenter traveling in India changes his life when he explodes in an act of violence out of proportion to its cause. The beginning of the end of a man's lifelong search for coherence is sparked by a Montana grizzly. A man blinded in the war in Vietnam wrestles with the implications of his actions as a soldier—and with innocence, both lost and regained. Punctuated with haunting images by acclaimed artist Alan Magee, *Resistance* is powerful fiction with enormous significance for our times.

Outside Simon and Schuster

Five hundred years ago an Italian whose name, translated into English, meant Christopher Dove, came to America and began a process not of discovery, but incursion -- "a ruthless, angry search for wealth" that continues to the present day. This provocative and superbly written book gives a true assessment of Columbus's legacy while taking the first steps toward its redemption. Even as he draws a direct line between the atrocities of Spanish conquistadors and the ongoing pillage of our lands and waters, Barry Lopez challenges us to adopt an ethic that will make further depredations impossible. *The Rediscovery of North America* is a ringingly persuasive call for us, at long last, to make this country our home.
