They called Jack “Golden Boy.” Star high school athlete, lots of money and a big house on the lake. No problems, no worries. Until his mom's funeral. Now his dad's in jail for running a Ponzi scheme and his little brother's dying of cancer. The doctors are pushing chemo and radiation. But his brother has only one wish—to runaway and find Kunik, the magical polar bear from an Inuit legend his mom used to tell. So Jack and his drifting friend, Jill, come up with a crazy plan. Sneak across the Canadian border all the way to the Arctic Ocean. On the journey, they discover a dark secret about their legend, and why it can't be told in the North anymore. It's a fast-paced adventure novel with shades of magical realism. Starting in Lake Oswego, Oregon, the characters con their way to the Arctic on a stolen boat, a “sort of” rented SUV, and

finally a rogue bush plane.

They brave the perilous but beautiful Dempster highway, meet First Nations people, and learn how native children were displaced to Indian Residential Schools, a miserable social experiment designed to kill the Indian in the child. In addition to *Chasing the Wild*, John Heninger has authored the *Secrets of the Netherside* trilogy, consisting of *The Nightkeeper's Shadow*, *Escape from Pandemonia* and *Eyes in the Stone*. Mr. Heninger lives in Lake Oswego, Oregon, with his wife and two sons.

Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear understanding of the way in which freight is transported by sea and the role of ports in this exchange. At the cutting edge in its assessment of the industry, Maritime Logistics covers the whole scope of maritime logistics and examines latest

logistical developments within the port and shipping industry. With a range of new international contributors, this new edition has been thoroughly revised and updated. There are new chapters on port centric logistics, hinterland logistics and global supply chains, maritime transport and logistics as a trade facilitator, and future trends and developments. Written by a team of international experts with over fifty years' experience in the field, Maritime Logistics provides a truly global perspective. The book covers everything that students of logistics, as well as those working within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more.

stunning swimming pools. Since the ancient times, when manmade baths enhanced the gardens of Egyptian nobles, pools have been built as the ultimate symbols of luxury and leisure, providing a means of capturing one of nature's most elusive elements. Soon after the pool arrived in America in the nineteenth century, California became a mecca for pool owners, where many advances in pool design have been made over the last century. Reflections on the Pool presents 40 perfect pools in 100 brilliant color photographs. These include the vibrant, Mexican-style architectural design of Ricardo Legorreta and the avant-garde, sensational creations of John Lautner, and illustrate the theories of the renowned landscape designers Thomas Church and Isabelle Greene. Each section of the book features a type of pool, or an element of pool design. Pools imitating nature, lap pools, architectural or highly ornamented pools are discussed in detail, as well as historic pools such as Hearst's Neptune Pool at San Simeon or Thomas Church's vanguard kidney-bean-shaped design of 1948, and other early California examples that set precedents for the pools of today. The introduction outlines technical aspects of design, and gives a brief history of the pool, including the influence of Hollywood on its popularity. Whether you
