Are archetypes transmitted more by culture than biology ...  
We do know from the Genome Project that genetically there are only a small number of biological codes out of which all of biological life in its vast, varied formation has arisen. So why not look at the identified set of archetypes as being a certain number of psychical codes, out of which our psyche has arisen in its vast, varied formation.  
**Jungian archetypes - Wikipedia**  
Jungian archetypes are defined as universal, archaic symbols and images that derive from the collective unconscious, as proposed by Carl Jung.They are the psychic counterpart of instinct.That is to say they are a kind of innate unspecific knowledge, derived from the sum total of human history, which prefigures and directs conscious behavior.
