With a foreword by Guenther Steiner - Team Principal of the Haas Formula One Team,

Formula 1: The Pinnacle tracks a history of the changes which have taken F1 from its rudimentary beginnings to the exhilarating high octane spectacle it is today. The biggest change in a generation is coming to F1 in 2022. Technical changes aimed at levelling the playing field for the teams combined with the sport's tightening budget cap will make the races closer than ever. There will be more sprint races – trialled in 2021 – and greater fan interest driven by Netflix's hugely successful 'Drive to Survive' series. So, how did we get here? How did F1 become the acknowledged 'Pinnacle of Motorsport'? Simon Arron and Tony Dodgins have identified the 100 most significant changes to the series since its inception in 1950. Formula One is unrecognizable from its debut season, where drivers raced around on old bomber training aerodrome in Northamptonshire with oil drums to mark the corners and straw bales the only concession to safety. New fans will welcome a complete and highly illustrated guide to the history of F1, while older fans will be able to compare their own views of what were the pivotal moments of change, in a book written by experienced motoring writers with two lifetimes worth of knowledge of the sport. The book will link technical progress with the personalities involved, indeed many of the swiftest changes have come about as a result of accidents or

tragedies – the death of Roland Ratzenberger at Imola in 1994, the same weekend as Ayrton Senna, could have been avoided by the HANS safety device. The introduction of the halo saved Romain Grosjean's life in Bahrain last year, but only came about because of the tragic accident that claimed Jules Bianchi in Japan. Along with changes to circuits and the technology of the cars, this book highlights the commercial changes and the controversies that threatened to split the sport apart - such as the threat of breakaway series proposed at various times by teams. A must-read for completists or for those new to the sport, F1: The Pinnacle is a fascinating insight into one of the most exciting and dangerous sports in the world.

Embodying the perfect combination of beauty, performance, exclusivity, and Italian flair, its vehicles have made it the world's most iconic carmaker. Though Ferrari has always produced road cars, the company has first and foremost focused on competition models, such as the handful of cars built in low-number serial production that campaigned on race courses the world over in the 1950s and 60s. In Ferrari Hypercars: The Story of Maranello's Fastest,

Rarest Road Cars, author Winston Goodfellow profiles some of Ferrari's top creations--vehicles so startling in their performance capabilities that they surpass modern terms and attain the status of "hypercar." This book begins by reaching back to the 1950s to establish the lineage of hypercars and goes on to showcase the best known examples since the 288 GTO, including the F40, F50, Enzo, and all-new la Ferrari. Rover's big hatchback saloon of the 1970s and 1980s had all the elements of a superb motor car. It was the work of long-standing Rover engineers, with substantial input from their colleagues at Triumph. The SD1's top models even shared their V8 engines with earlier and much-loved classics from Rover. It was stunningly attractive, cleverly derived from Italian supercar styling and still extraordinarily practical thanks to its large hatchback configuration. In this new book, Rover historian James Taylor tells the full story of the SD1, warts and all, from initial concept to final production model. The oft-criticized early models and the more successful later variants are discussed as well as the exclusive Vitesse and Vanden Plas models and overseas and police variants. Finally, for those inspired enough to seek one out today, there is guidance on purchase and ownership. Includes full production histories and comprehensive specification details and is fully illustrated with 200 colour and 70 black & white photographs.
