I type "International Teaching Jobs" on the Google search line and find myself looking at a long list of teaching jobs all over the world. "Anything in Latin America?" my wife asks, coming into the room.. "No... but here's one in the Congo." "Africa!!!" "Yea... really. They want a calculus teacher! I can do that!" "Okay," Chantal says tentatively. "If you want." I hit the submit button

and my resume is off across the world. What follows are four action-packed years of living, working and traveling in sub-saharan Africa. This book chronicles the second, third and fourth years of these adventures, including the day-to-day life of a teacher at The American School of Kinshasa from 2007-2009 who deals with a marginal infrastructure, the everyday challenges of living in a war-torn third-world country, and has adventures in South Africa, Kenya, Ghana, Uganda and Zanzibar. This is the sequel to the book, *Calculus in the Congo Book 1*.

In this much anticipated first edition, the authors present the basic canons of first-year calculus, but motivated through real biological problems. The two main goals of the text are to provide students with a thorough grounding in calculus concepts and applications, analytical techniques, and numerical methods and to have students understand how, when, and why calculus can be used to model biological phenomena. Both students and instructors will find the book to be a gateway to the exciting interface of mathematics and biology.

Change, 5th edition, is designed to accomplish the main goals of the Precalculus course: to build a solid mathematical foundation and prepare students for Calculus. The authors achieve this by focusing on a small number of key topics, thereby emphasizing depth of understanding rather

than breadth of coverage. Functions Modeling Change, 5th edition, presents each function symbolically, numerically, graphically and verbally (the Rule of Four). Additionally, a large number of real-world applications, examples, and problems enable students to create

mathematical models that relate to the world around them.
