Convair B-36: A Comprehensive History of America's "Big Stick" is a collaborative effort edited and co-authored by Meyers H. Jacobsen exploring the history of one of SAC's air giants, the six-engine Convair B-36. From the origins of the use of six engines on bombers from around the world, along with the history and development of SAC and the use of its numbers of B-36's, this book will give the reader a greater amount of information than has ever before been published on the Convair B-36. Included with the technical and historical aspects of the B-36's use in SAC, are first hand anecdotes and accounts from the men who serviced, flew, and proudly served in SAC under Curtis LeMay. There are also detailed sections on the electronic countermeasures and various armament configurations applied in the B-36, as well as chapters containing information on B-36 attrition, and detailed accounts of the survivors that exist to this day. A wonderful book for aircraft historians, modellers, and SAC enthusiasts.

The evidence in this book may not ultimately give you the "smoking gun" you are looking for on your journey, but I guarantee it will give you a box of bullets when you find it. In 1996, John Greenewald, Jr. began researching the secret inner workings of the U.S. Government at the age of fifteen. He targeted such agencies as the CIA, FBI, Pentagon, Air Force, Army, Navy, NSA, DIA, and countless others. Greenewald utilized the Freedom of Information Act (FOIA) to gain access to more than two million pages of documents. This archive includes information relating to UFOs, the JFK Assassination, chemical, biological, and nuclear weapons, and top secret aircraft. He took the millions of pages, and over the course of more than two decades, has built an archive known around the world, as The Black Vault. Inside The Black Vault: The Government's UFO Secrets Revealed takes you on a journey within the secret world of unidentified aerial phenomenon that has plagued the military since at least the 1940s. Declassified records prove that the UFO topic is one of the most highly classified and most elusive subjects the U.S. Government has ever dealt with. Each chapter explores various agencies and their documents, and Greenewald breaks down the meaning of why some of the most important documents are relevant to proving a massive cover-up. Along with declassified documents, Greenewald outlines the struggle it took him to get them. No other topic has proven so difficult, in more than 8,000 FOIA requests that he has filed. He explores why that might be and meets skeptics and debunkers head on, outlining why some of their more prominent rebuttals for it all cannot be true.

Discover the definitive history of DARPA, the Defense Advanced Research Project Agency, in this Pulitzer Prize finalist from the author of the New York Times bestseller Area 51. No one has ever written the history of the Defense Department's most secret, most powerful, and most controversial military science R&D agency. In the first-ever history about the organization, New York Times bestselling author Annie Jacobsen draws on inside sources, exclusive interviews, private documents, and declassified memos to paint a picture of DARPA, or "the Pentagon's brain," from its Cold War inception in 1958 to the present. This is the book on DARPA -- a compelling narrative about this clandestine intersection of science and the American military and the often frightening results.

The explosive, untold story of the Cold War's biggest secret. The REAL X-Files. It is the most famous military installation in the world. And no credible insider has ever divulged the truth about his time inside of it. Until now. This is the first book based on interviews with scientists, pilots, and engineers - 58 in total - who provide an unprecedented look into the mysterious activities of a top-secret base, from the Cold War to today. With a jaw-dropping ending, it proves that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Many people will remember that Rachel Carson predicted a silent spring, but she also warned of a fruitless fall, a time with no pollination and no fruit. The fruitless fall nearly became a reality when, in 2007, beekeepers watched thirty billion bees mysteriously die. And they continue to disappear. The remaining pollinators, essential to the cultivation of a third of American crops, are now trucked across the country and flown around the world, pushing them ever closer to collapse. Fruitless Fall does more than just highlight this growing agricultural catastrophe. It emphasizes the miracle of flowering plants and their pollination partners, and urges readers not to take the abundance of our Earth for granted. A new afterword by the author tracks the most recent developments in this ongoing crisis.

A powerful story of war in our time, of love of country, the experience of tragedy, and a platoon at the center of it all. This is a story that starts off close and goes very big. The initial part of the story might sound familiar at first: it is about a platoon of mostly nineteen-year-old boys sent to Afghanistan, and an experience that ends abruptly in catastrophe. Their part of the story folds into the next: inexorably linked to those soldiers and never comprehensively reported before is the U.S. Department of Defense's quest to build the world's most powerful biometrics database, with the ability to identify, monitor, catalog, and police people all over the world. First Platoon is an American saga that illuminates a transformation of society made possible by this new technology. Part war story, part legal drama, it is about identity in the age of identification. About humanity—physical bravery, trauma, PTSD, a yearning to do right and good—in the age of biometrics, which reduce people to iris scans, fingerprint scans, voice patterning, detection by odor, gait, and more. And about the power of point of view in a burgeoning surveillance state. Based on hundreds of formerly classified documents, FOIA requests, and exclusive interviews, First Platoon is an investigative exposé by a master chronicler of government secrets. First Platoon reveals a post-9/11 Pentagon whose identification machines have grown more capable than the humans who must make sense of them. A Pentagon so powerful it can cover up its own internal mistakes in pursuit of endless wars. And a people at its mercy, in its last moments before a fundamental change so complete it might be impossible to take back.

Bob Lazar is the reason Area 51 became infamous in the 1980s and his recent appearance on Joe Rogan's podcast with 7 million listeners is credited with inspiring the Storm Area 51 phenomenon. In his DREAMLAND autobiography, Lazar reveals every detail of his highly controversial story about being an insider within the world's most legendary military research base. Bob Lazar was a brilliant young physicist that found himself employed at a top secret facility in the middle of the desert outside Las Vegas. Under the watchful eye of the government elite, he is tasked with understanding an exotic propulsion system being used by an advanced aerospace vehicle he is told came from outer space. The stressful work and long, odd hours start to wear on Bob and he becomes concerned for his safety. He tells his wife and a couple close friends about what he's doing in the desert, and his employers find out and are furious. When they station goons outside his house, Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the "flying saucer." On the way home, they are stopped by the police, who notify the base, and Bob loses his job. In a series

of interviews with CBS TV, Bob Lazar then blows the lid off "Area 51," blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

Detroit Rock City is an oral history of Detroit and its music told by the people who were on the stage, in the clubs, the practice rooms, studios, and in the audience, blasting the music out and soaking it up, in every scene from 1967 to today. From fabled axe men like Ted Nugent, Dick Wagner, and James Williamson jump to Jack White, to pop flashes Suzi Quatro and Andrew W.K., to proto punkers Brother Wayne Kramer and Iggy Pop, Detroit slices the rest of the land with way more than its share of the Rock Pie. Detroit Rock City is the story that has never before been sprung, a frenzied and schooled account of both past and present, calling in the halcyon days of the Grande Ballroom and the Eastown Theater, where national acts who came thru were made to stand and deliver in the face of the always hard hitting local support acts. It moves on to the Michigan Palace, Bookies Club 870, City Club, Gold Dollar, and Magic Stick -- all magical venues in America's top rock city. Detroit Rock City brings these worlds to life all from the guys and dolls who picked up a Strat and jammed it into our collective craniums. From those behind the scenes cats who promoted, cajoled, lost their shirts, and popped the platters to the punters who drove from everywhere, this is the book that gives life to Detroit's legend of loud.

Founded in 1958 in response to the launch of Sputnik, DARPA has been responsible for countless inventions and technologies that have evolved from the agency's mission- forward-thinking solutions to the Pentagon's challenges. Sharon Weinberger gives us a riveting account of DARPA's successes and failures, useful

innovations and wild-eyed schemes- we see how the nuclear threat sparked investment in computer networking, which led to the Internet, as well as plans to power a missile-seeking particle beam by draining the Great Lakes...how, in Vietnam, DARPA developed technology for the world's first armed drones and was also responsible for Agent Orange... how DARPA's recent success with self-driving cars is counterbalanced with its disappointing contributions to the Afghanistan and Iraq wars. Weinberger has spoken to dozens of former DARPA and Pentagon officials--many of whom had never been interviewed before about their work with the agency--and synthesized countless documents obtained under the Freedom of Information Act. The result is a riveting history of a meeting point of science, technology, and politics.

The Imagineers of War To The Stars

Often described as the misuse of science, chemical and biological weapons have incurred widespread opposition over the years. Despite condemnation from the United Nations, governments, and the disarmament lobby, they remain very real options for rogue states and terrorists. In this new edition of *Agents of War*, Edward M. Spiers has expanded and updated this much-needed history with two new chapters on political poisoning and chemical weapons in the Middle East. Spiers breaks new ground by presenting his analysis in both historical and contemporary contexts, giving a comprehensive chronological account of why, where, and when such weapons were used or suspected to be deployed.

The New York Times Bestseller The Explosive National Bestseller "A backstage pass to the wildest and loudest party in rock history—you'll feel like you were right there with us!" —Bret Michaels of Poison Nothin' But a Good Time is the definitive, no-holds-barred oral history of 1980s hard rock and hair metal, told by the musicians and industry insiders who lived it. Hard rock in the 1980s was a hedonistic and often intensely creative wellspring of escapism that perfectly encapsulated—and maybe even helped to define—a spectacularly over-the-top decade. Indeed, fist-pumping hits like Twisted Sister's "We're Not Gonna Take It," Mötley Crüe's "Girls, Girls, Girls," and Guns N' Roses' "Welcome to the Jungle" are as inextricably linked to the era as Reaganomics, PAC-MAN, and E.T. From the do-or-die early days of self-financed recordings and D.I.Y. concert productions that were as flashy as they were foolhardy, to the multi-Platinum, MTV-powered glory years of stadium-shaking anthems and chart-topping power ballads, to the ultimate crash when grunge bands like Nirvana forever altered the entire climate of the business, Tom Beaujour and Richard Bienstock's *Nothin' But a Good Time* captures the energy and excess of the hair metal years in the words of the musicians, managers, producers, engineers, label executives, publicists, stylists, costume designers, photographers, journalists, magazine publishers, video directors, club bookers, roadies, groupies, and hangers-on who lived it. Featuring an impassioned foreword by Slipknot and Stone Sour vocalist and avowed glam metal fanatic Corey Taylor, and drawn from over two hundred author interviews with members of Van Halen, Mötley Crüe, Poison, Guns N' Roses, Skid Row, Bon Jovi, Ratt, Twisted Sister, Winger, Warrant, Cinderella, Quiet Riot and others, as well as Ozzy Osbourne, Lita Ford, and many more, this is the ultimate, uncensored, and often unhinged, chronicle of a time where excess and success walked hand in hand, told by the men and women who created a sound and style that came to define a musical era—one in which the bands and their fans went looking for nothin' but a good time...and found it.

Operation Paperclip Lennex

This "compellingly hard-hitting" bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In *Area 51*, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, *Area 51* weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.
