Over the years auditing has developed into a specialised function with complex ethical, legal and economic implications. The role of auditors in providing credibility is even more important in a society like Hong Kong, which relies heavily on its reputation as an international financial and business centre. The financial crises and accounting scandals reported in recent years, which led to economic meltdowns and massive loss in

capital resources across the globe, highlights the vital role of auditors as gatekeepers and the importance of high quality auditing in ensuring corporate transparency and honest financial reporting. The third edition is thoroughly revised to take into account the new Companies Ordinance (Chapter 622, effective 2014) and Hong Kong Standards on Quality Control, Auditing, Assurance and Related Services (updated June 2014), and numerous developments of a full range of auditing topics since the previous edition, including: Auditors legal duties and liabilities Auditor quality Auditors ethical behaviour Corporate governance Statistical sampling Pitfalls in computerisation of accounting services Use of computer-assisted-audit-techniques (CAATs) Audit reporting

Auditing standards Along with recent development of the profession and cutting-edge research findings, this book boldly draws on economic theories to explain aspects of auditing. Certain economic concepts that are applicable to all aspects of an audit are addressed for students and practitioners alike. By utilising graphics, tables and intriguing cases, this book will serve as a useful companion for accounting and legal practitioners. This is also a textbook for students preparing for university studies, practical training and professional accounting examinations. At the end of each chapter, there are dozens of exercises, cases and discussion questions for the benefits of teachers, students and life-long learners. Published by City University

Auditing, an Integrated Approach
Irwin/McGraw-Hill

As we begin the new year, this title is currently the most up-to-date auditing textbook on the market, covering all of the latest pronouncements through the end of 2011. The book 's unique organization presents the auditing process in twelve concise chapters, with eight flexible, independent modules designed to be integrated into the course entirely at the instructor's discretion. Perhaps most importantly, this title is the only book on the

market to fully integrate the Codification of the New Clarity Standards (including new section) issued by the Auditing Standards Board. As these standards will be effective for year-end audits after December 15, 2012, they will be covered on the CPA exam beginning in July 2013, when many current students will be taking the CPA exam after completing 150 hours of coursework. In addition, the Louwers book also brings the real world into the classroom through the addition of extensive Auditing Insights involving real issues facing today's professionals as well as the updated Apollo Shoes Casebook, the only stand-alone fraud audit case on the market (available on the book's website, www.mhhe.com/louwers5e). Throughout the revised text, the Louwers author team has updated each chapter to include the latest pronouncements, technology and case material for your auditing classes: This edition has fully integrated the eight new standards adopted by the PCAOB. And, most importantly, the risk assessment chapter was restructured to incorporate the exacting risk assessment process as outlined in the new PCAOB risk standards. The book has fully integrated the latest updates from the International Standards of Auditing (ISAs) and the Auditing Standards Board (ASB). Each chapter now begins with a list of the AU/ISA Sections that are covered from the Codification of Statements on Auditing Standards published by the AICPA and the list of PCAOB Auditing Standards covered

in that chapter. This edition incorporates the major changes to the structure and the content of the auditing section of the CPA examination for 2011 and has been designed to provide multiple opportunities for students to practice questions that they will encounter on the CPA exam. Each chapter has an abundance of multiple choice questions. In addition, to provide experience with the task-based exam approach, Kaplan CPA Simulations are included in the text problem material and are also accessible at www.mhhe.com/louwers5e. These multiple choice questions and simulations allow the student to gain skills and pick up additional knowledge for success on the CPA Examination. The education version of ACL software is included free with the book.

Exercises for use with the ACL software are available on the book's website. The book is also fully integrated with McGraw-Hill's Connect™ Accounting. The next evolution in online homework management and assessment, McGraw-Hill's Connect™ Accounting is an online assignment and assessment solution that connects you with the tools and resources you'll need to achieve success: Access to end-of-chapter material that provides immediate feedback and reports directly to your instructor's reports. Access to lectures and study tools like PowerPoint® slides. If you are interested in a straight-forward, interactive and eco-friendly knowledge acquisition process, the Louwers text can help. The book is now integrated fully with McGraw-

Hill's ConnectPlus Accounting, you also receive access to a searchable, integrated online version of the textbook to help you successfully complete your work whenever and wherever you choose. If your instructor chooses to use McGraw-Hill's Connect™ Accounting with your course, you can purchase access from the Online Learning Center at www.mhhe.com/louwers5e. "Thank you for considering the thirteenth edition of Essentials of Accounting for Governmental and Not-for-Profit Organizations. I have used the text with traditional three-semester-hour classes, with half-semester GNP courses, and as a module in advanced accounting classes. It is appropriate for accounting majors or as part of a public administration program. The Excel-based problems were developed to facilitate delivery though distance learning formats. The focus of the text is on the preparation of external financial statements. The coverage is effective in preparing candidates for the CPA examination"--

This book is a result of the ISD'97, Sixth

International Conference on Information Systems Development-Methods and Tools, Theory and Practice held August 11-14, 1997 in Boise, Idaho, USA. The purpose of this Conference was to address the issues facing academia and industry when specifying, developing, managing and improving software systems. The selection of papers was carried out by the International Program Committee. All papers were reviewed in advance by at least three people. Papers were judged according to their originality, relevance and presentation quality. All papers were judged purely on their own merits, independently of other submissions. This year's Information Systems Development Conference-ISD'97 is the first ISD conference being held in the US. ISD was brought into existence almost ten years ago. It continues the fine tradition of the first Polish-Scandinavian Seminar on Current Trends in Information Systems Development Methodologies, held in Gdansk-Poland in 1988. ISD'98 will be held in Bled, Slovenia. ISD'97

consists not only of the technical program represented in these proceedings, but also tutorials on improved software testing and end-user information systems and workshop on sharing knowledge within international high technology industries that are intended for both, the research and business communities. We would like to thank the authors of papers accepted for ISD'97 who all made gal lant efforts to provide me with electronic copies of their manuscripts conforming to com mon guidelines. We thank them for thoughtfully responding to reviewers comments and carefully preparing their final contributions.

Auditing Pearson Higher Ed

Messier employs the new audit approach currently being used by auditing professionals. This new approach is a direct result of the demands of Sarbanes-Oxley, which has changed the way auditors do their jobs. The new auditing approach emphasizes

understanding the entity (i.e., the organization or business being audited) and its environment (i.e. industry), and then assessing the business risks faced by the entity and how management controls those risks. This new audit process focuses on business processes instead of accounting cycles. This unique and innovative approach has been developed in response to changing market dynamics. The systematic approach, referred to in the subtitle of the text, reflects the early introduction of three basic concepts that underlie the audit process: materiality, audit risk, and evidence; this allows Messier to build upon this model in subsequent chapters. These are central to everything an auditor does and a unique feature of Messier. As such, this approach helps students develop auditor judgment, a vital skill in today's auditing environment.
