The Cambridge Guide to Homer Rosetta Books From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The Cambridge Guide to Homer examines the influence and

meaning of Homeric poetry from its earliest form as ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter

complementary 'micropedia' articles. The Cambridge Guide to Homer thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Acronym
agglomeration is an affliction of the age, and there are acronym addicts who, in their

weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received

or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is

urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific,

technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This

edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.

Magic or spycraft? In 1953, against the backdrop of the Cold War, the CIA initiated a top-secret program, code-named MKULTRA, to counter Soviet mind-control and interrogation techniques.

Realizing that clandestine officers might need to covertly deploy newly developed pills, potions, and powders against the adversary, the CIA hired America's most famous magician, John Mulholland, to write two manuals on sleight of hand and undercover communication techniques. In 1973, virtually all documents related to MKULTRA were destroyed. Mulholland's manuals were thought to be among them—until a single surviving copy of each, complete with illustrations, was recently discovered in the agency's archives. The manuals

reprinted in this work represent the only known complete copy of Mulholland's instructions for CIA officers on the magician's art of deception and secret communications.

Today our fatigue feels chronic; our anxieties, amplified. Proliferating technologies command our attention. Many people complain of burnout, and economic instability and the threat of ecological catastrophe fill us with dread. We look to

the past, imagining life to have once been simpler and slower, but extreme mental and physical stress is not a modern syndrome. Beginning in classical antiquity, this book demonstrates how exhaustion has always been with us and helps us evaluate more critically the narratives we tell ourselves about the phenomenon. Medical, cultural, literary, and biographical sources have cast exhaustion as a biochemical imbalance, a somatic ailment, a viral disease, and a spiritual failing. It has been linked to loss, the alignment of the planets, a

perverse desire for death, and social and economic disruption. Pathologized, demonized, sexualized, and even weaponized, exhaustion unites the mind with the body and society in such a way that we attach larger questions of agency, willpower, and well-being to its symptoms. Mapping these political, ideological, and creative currents across centuries of human development, Exhaustion finds in our struggle to overcome weariness a more significant effort to master ourselves.

The Sicilian Mafia, or Cosa
Nostra, is one of the most
intriguing criminal phenomena in
the world. It is an unparalleled
organised criminal grouping that
over almost two centuries has
been able not only to successfully
permeate licit and illicit economy,
politics and civil society, but also
to influence and exercise
authoritative power over both the
underworld and the upper-world.
This criminal phenomenon has
been a captivating conundrum for
scholars of different disciplines
who have tried to explain with
various paradigms the reasons
behind the emergence and
consolidation of the mafia.
Challenging the Mafia Mystique

provides an analysis of the changes
the Sicilian mafia has undergone,
from legitimisation to
denunciation. Rino Coluccello
highlights how, from the very
emergence of the organised
criminal groups in Sicily, a culture
existed that was protective and
tolerant of the mafia. He argues
that the various conceptualisations
of the mafia that dominated the
public and scientific debate in the
nineteenth and more than half of
the twentieth century created a
mystique, which legitimised the
mafia and contributed to their
success. This book will be of great
interest to scholars and students of
organised crime, Italian politics
and Italian literature.

"An Airflow bible. Useful for all kinds of users, from novice to expert." - Rambabu Posa, Sai Aashika Consultancy Data Pipelines with Apache Airflow teaches you how to build and maintain effective data pipelines. A successful pipeline moves data efficiently, minimizing pauses and blockages between tasks, keeping every process along the way operational. Apache

Airflow provides a single customizable environment for building and managing data pipelines, eliminating the need for a hodgepodge collection of tools, snowflake code, and homegrown processes. Using real-world scenarios and examples, Data Pipelines with Apache Airflow teaches you how to simplify and automate data pipelines, reduce operational overhead, and smoothly integrate all the technologies in your stack. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About

the technology Data pipelines manage the flow of data from initial collection through consolidation, cleaning, analysis, visualization, and more. Apache Airflow provides a single platform you can use to design, implement, monitor, and maintain your pipelines. Its easy-to-use UI, plug-and-play options, and flexible Python scripting make Airflow perfect for any data management task. About the book Data Pipelines with Apache Airflow teaches you how to build and maintain effective data pipelines. You'll explore the most common usage patterns, including

aggregating multiple data sources, connecting to and from data lakes, and cloud deployment. After enjoying years as a popular
journalist and poet, intellectual
and freethinker Gerald Massey
turned his vast studies in the field
of Egyptology into *A Book of the
Beginnings*, a bold statement that
the origin of all civilization lays
in ancient Egypt. His assertions,
radical at the time—indeed, almost
a century before the discovery of
three-million-year-old human
remains in Africa—resonate loudly
today, when molecular biology is
making corresponding
discoveries alongside the still-
raging creation-versus-evolution
controversy. In Volume II,
Massey intelligently argues an

Egyptian origin for Biblical
symbolism, lexicography, and
mythology. Here, he not only asks
if the oldest Jewish and Christian
axioms were really born on the
banks of the Nile, he offers a
stalwart and profound "Yes!"
British author GERALD
MASSEY (1828-1907) published
works of poetry, spiritualism,

Pacific Rim: Tales From Year Zero Springer

The entertainment industry has long been dominated by legendary screenwriter William Goldman's "Nobody-Knows-Anything" mantra,

which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage – the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney's recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new

entertainment product succeed.

The book thus offers a timely alternative to "Nobody-Knows" decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston – two of our finest scholars in the area of entertainment marketing

– have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can't be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners

of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science's winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. Allègre

Lists and Catalogues in Ancient Literature and Beyond Open Book Publishers

This book lends the history of Tom's de Torquemada, the Dominican Friar who later became the confessor to Queen Isabella and Grand Inquisitor in the Inquisition. His zeal in expelling crypto-Jews and Muslims from the Iberian peninsula is known to have influenced Ferdinand and Isabella, resulting in at least 250,000 Jews and Muslims being forced to flee Spain.

Lists and catalogues have been

en vogue in philosophy, cultural, media and literary studies for more than a decade. These explorations of enumerative modes, however, have not yet had the impact on classical scholarship that they deserve. While they routinely take (a limited set of) ancient models as their starting point, there is no comparably comprehensive study that focuses on antiquity; conversely, studies on lists and catalogues in Classics remain largely limited to individual texts, and – with some notable exceptions – offer little in terms of explicit theorising. The

present volume is an attempt to close this gap and foster the dialogue between the recent theoretical re-appraisal of enumerative modes and scholarship on ancient cultures. The 16 contributions to the volume juxtapose literary forms of enumeration with an abundance of ancient non-, sub- or para-literary practices of listing and cataloguing. In their different approaches to this vast and heterogenous corpus, they offer a sense of the hermeneutic, epistemic and methodological challenges with which the study of enumeration is faced, and elucidate how

pragmatics, materiality, performativity and aesthetics are mediated in lists and catalogues.

A Short History of Greek Literature from Homer to Julian Columbia University Press

Armed robotic systems-drones and droids-now emerging on the battlefield portend new strategic realities not only for U.S. forces but also for our allies and future potential belligerents. Numerous questions of immediate warfighting importance

come to mind with the fielding of these drones and droids that are viewed as still being in their experimental and entrepreneurial stage of development. By drawing upon historical weapons systems life cycles case studies, focusing on the early 9th through the mid-16th-century knight, the mid-19th through the later 20th-century battleship, and the early 20th through the early 21st-century tank, the monograph provides military historical context related to their emergence, and better

allows both for questions related to warfighting to be addressed, and policy recommendations related to them to be initially provided. Hebrew Myths Simon & Schuster Love and tragedy dominate book four of Virgil's most powerful work, building on the violent emotions invoked by the storms, battles, warring gods, and monster-plagued wanderings of the epic's opening. Destined to be the founder of Roman culture, Aeneas, nudged by the gods, decides to leave his beloved Dido, causing her suicide in

pursuit of his historical destiny. A dark plot, in which erotic passion culminates in sex, and sex leads to tragedy and death in the human realm, unfolds within the larger horizon of a supernatural sphere, dominated by power-conscious divinities. Dido is Aeneas' most significant other, and in their encounter Virgil explores timeless themes of love and loyalty, fate and fortune, the justice of the gods, imperial ambition and its victims, and ethnic differences. This course book offers a portion of the original Latin text, study questions, a commentary, and

interpretative essays. Designed to stretch and stimulate readers, Ingo Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and discussion of the most recent scholarly thought. *Dictionary of Deities and Demons in the Bible* Farrar, Straus and Giroux
“You can’t reform profit capitalism and inhumanity. Just kick it till it breaks.” — Angry Brigade, communiqué. Between 1970 and 1972 the Angry Brigade used guns and bombs in a series of symbolic attacks against property. A series of communiqués accompanied the actions, explaining the choice of targets and the Angry Brigade philosophy: autonomous organization and attacks on property alongside other forms of militant working class action. Targets included the embassies of repressive regimes, police stations and army barracks, boutiques and factories, government departments and the homes of Cabinet ministers, the Attorney General and the Commissioner of the Metropolitan Police. These attacks on the homes of senior political figures increased the pressure for results and brought an avalanche of police raids. From the start the police were faced with the difficulty of getting to grips with a section of society they found totally alien. And were they facing an organization—or an idea? This documentary, produced by Gordon Carr for the BBC (and first shown in January 1973, shortly after the trial), covers the roots of the Angry Brigade in the revolutionary ferment of the 1960s, and follows their campaign and the police investigation to its culmination in the “Stoke Newington 8” conspiracy trial at the Old Bailey—the longest criminal trial in British legal history. Produced after extensive research—among both the libertarian opposition and the

police—it remains the essential study of Britain’s first urban guerilla group. Extra: The Persons Unknown (1980, 22 minutes) The so-called “Persons Unknown” case in which members of the Anarchist Black Cross were tried (and later acquitted) at the Old Bailey on charges of “conspiring with persons unknown, at places unknown, to cause explosions and to overthrow society.” Featuring interviews and footage of Stuart Christie, Nicholas Walter, Crass and many other UK anarchist activists and propagandists of the time.
