Just as the Galactic Empire used great fleets of starships to expand Imperial control across the galaxy, the subsequent authoritarian government, the First Order, used even more technologically advanced ships to unify planetary systems and crush all opposition. With both regimes, the most abundant and ubiquitous ships in their respective fleets were the notoriously lethal TIE fighters. The TIE Fighter Owners' Workshop Manual presents a thorough history of Sienar Fleet Systems' twin ion engine space superiority fighter, from early concepts and prototypes to the mass-produced starfighters that fought countless battles against insurgent groups. The history of TIE fighters—including bombers, boarding craft, and shuttles—is fully illustrated with numerous photographs, schematics, exploded diagrams, and computer-generated artwork by Star Wars™ vehicle experts Chris Reiff and Chris Trevas. Text is by Ryder Windham, author and co-author of more than 70 Star Wars books. This Haynes Manual is the most thorough technical guide to TIE fighters available, and is fully authorized and approved by Lucasfilm. Operator and Organizational Maintenance Manual Insight Editions

A unique Haynes Manual, providing fascinating technical insight into the development and use of rocket planes, focusing on the iconic X-15, which carried out much of the development work for the Apollo and Space Shuttle space programmes. As of July 2015, the X-15 still holds the world record for the highest speed ever attained by a manned aircraft, at 4,520mph (Mach 6.72)! The X-15 was flown by a band of elite test pilots, including the first man to walk on the Moon, Neil Armstrong. The X-15 made 199 flights between 1959 and 1968, several of which were above the line considered to be the arbitrary altitude where space begins. The engaging text, extensively illustrated with period photographs and technical illustrations, explains how the vehicle worked, what it pioneered for future applications in more conventional aircraft and manned spacecraft developed by NASA from 1958, and what it was like to fly.
