Like three guides in one, Scientific Argumentation in Biology combines theory, practice, and biological content. This thought-provoking book starts by giving you solid background

in why students need to be able to go beyond expressing mere opinions when making research-related biology claims. Then it provides 30 field-tested activities your students can use when learning to propose, support, and evaluate claims; validate or refute them on the basis of scientific reasoning; and craft complex written arguments. Detailed teacher notes suggest specific ways to use the activities to enrich and supplement (not replace) what you're doing in class already. You'll find Scientific Argumentation to be an ideal way to help your students learn standards-based content, improve their practices, and develop scientific habits of mind.

Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey. His ideas about intelligence and creativity - explicated in such bestselling books as *Frames of Mind* and *Multiple Intelligences* (over 200,000 copies in print combined) - have revolutionized our thinking. In his groundbreaking 1983 book *Frames of Mind*, Howard Gardner first introduced the theory of multiple intelligences, which posits that intelligence is more than a single property of the human mind. That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world. Now in *Intelligence Reframed*, Gardner provides a much-needed report on the theory, its evolution and revisions. He offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him. He also introduces two new intelligences (existential intelligence and naturalist intelligence) and argues that the concept of intelligence should be broadened, but not so absurdly that it includes every human virtue and value. Ultimately, argues Gardner, possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species, but also perhaps even a working definition of the species. Gardner also offers provocative ideas about creativity, leadership, and moral excellence, and speculates about the relationship between multiple intelligences and the world of work in the future.

Thomas Paine wrote the first part of *The Rights of Man* in 1791 as a response to the furious attack on the French Revolution by the British parliamentarian Edmund Burke in his pamphlet *Reflections on the Revolution in France*, published the previous year. Paine carefully dissects and counters Burke's arguments and provides a more accurate description of the events surrounding the revolution of 1789. He then reproduces and comments on the "Declaration of the Rights of Man and of Citizens" promulgated by the National Assembly of France. The manuscript of *The Rights of Man* was placed with the publisher Joseph Johnson, but that publisher was threatened with legal action by the British Government. Paine then gave the work to another publisher, J. S. Jordan, and on the advice of William Blake, Paine went to France to be out of the way of possible arrest in Britain. *The Rights of Man* was published in March 1791, and was an immediate success with the British public, selling nearly a million copies. A second part of the book, subtitled "Combining Principle and Practice," was published in February 1792. It puts forward practical proposals for the establishment of republican government in countries like Britain. *The Rights of Man* had a major impact, leading to the establishment of a number of reform societies. After the publication of the second part of the book, Paine and his publisher were charged with seditious libel, and Paine was eventually forced to leave Britain and flee to France. Today *The Rights of Man* is considered a classic of political writing and philosophy. This book is part of the Standard Ebooks project, which produces free public domain ebooks. Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).  
The Well-Crafted Argument Little, Brown

In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden?

*Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me*

clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

"Spurious Correlations ... is the most fun you'll ever have with graphs."--Bustle Military intelligence analyst and Harvard Law student Tyler Vigen illustrates the golden rule that "correlation does not equal causation" through hilarious graphs inspired by his viral website. Is there a correlation between Nic Cage films and swimming pool accidents? What about beef consumption and people getting struck by lightning? Absolutely not. But that hasn't stopped millions of people from going to tylervigen.com and asking, "Wait, what?" Vigen has designed software that scours enormous data sets to find unlikely statistical correlations.
