Argumentation as a
teaching and learning
method in the K-12
curriculum has received
increasing attention across
the globe. The reason for
this is simple:
argumentation helps
students develop necessary
critical thinking skills.
However, teaching this
method is not as

straightforward as it may appear. Placing the classroom at the centre of the investigation, this book seeks to throw light onto argumentation as a teaching practice by asking: What does it take to teach as argument? What does it mean to be 'argumentative' teachers? And, how can we create classroom environments that will help and encourage young people to develop their argument skills? Based on first-hand experience and extensive research, this volume guides the reader through argumentation with the focus placed on the relationship between this teaching method and effective learning and the need to investigate the role of teachers in encouraging argumentation in the classroom. Although there are a considerable number of tools and techniques that promote argumentation in the K-12 classroom, many teachers struggle to successfully implement them in the classroom. Aimed at addressing this issue, this book endeavours to instruct teachers on how to apply argumentation effectively in their day-to-day classes and to clarify argumentation as a teaching and learning strategy. As an important contribution to the field of argumentation and

education, this book will be of interest to researchers, post-graduate students, and secondary school teachers, alike.

My Educational Philosophy is that students need to proactively get their education for themselves. My teaching style involves lots of Collaborative Learning, a methodology that will require you to take responsibility for your education. Group Work plus good communications skills plus research and risk taking, practiced within a developing learning community will allow you to obtain the education you need. You will get that education, and live, in a highly multicultural world, a world which has been shrunk by technology, and by politics. It is imperative that you understand other cultures, as well as your own. At the same time you need to be technology-literate in order to prevail (as opposed to merely enduring to use William Faulkner's words) in the current millenium. In addition, I believe that you should strive for excellence in your education, and you must be a bit selfish to accomplish that--you need to GET YOURS. You have already selected an outstanding Community College, with lots of great teaching, to get the

first two years of your (relatively low cost) education. Your challenge in your life-long learning is to now figure out how to go to only two years of a great four-year school, then get your Masters Degree, etc. You need to figure out what your aptitudes and interests are, how to be admitted to a great school that will foster those, and how to fund that education. You cannot afford not to go to a great school. If you want to know which great school is best for you, and visit that school online, start your search at Princeton Review. If you need or want a scholarship, go now, immediately to FASTWEB.Com, and start your individual scholarship search. Do not say, next life I will go to Harvard--Do it this trip; do it now!

A classic and highly acclaimed biography of civil rights activist Malcolm X, ever more relevant for today's readers. As a 14-year-old he was Malcolm Little, the president of his class and a top student. At 16 he was hustling tips at a Boston nightclub. In Harlem he was known as Detroit Red, a slick street operator. At 19 he was back in Boston, leading a gang of burglars. At 20 he was in prison. It was in prison that Malcolm Little started the journey that would lead him to adopt the name Malcolm X, and there he developed his beliefs about what being black means in America: beliefs that shook America then, and still shake America today. Few men in American history are as controversial or compelling as Malcolm X. In this Coretta Scott King Honor Book, Walter Dean Myers, winner of a Newbery Honor and four-time Coretta

Scott King Award winner, portrays Malcolm X as prophet, dealer, convict, troublemaker, revolutionary, and voice of black militancy.

The Four Day School Week Springer Science & Business Media
In productive classrooms, teachers don't just teach students math and reading skills; they build emotionally and relationally healthy learning communities.

Teachers create intellectual environments that produce not only technically competent students, but also caring, secure, actively literate human beings. Choice Words: How Our Language Affects Children's Learning shows how teachers can accomplish this by using their most powerful teaching tool: language. Throughout this book, author Peter Johnston provides examples of seemingly ordinary words, phrases, and uses of language that are pivotal in the orchestration of the classroom. Grounded in a study by accomplished literacy teachers, the book demonstrates how and what we say (and don't say) have surprising consequences for what children learn and for who they become as literate people. Students

learn how to become strategic thinkers, not merely learning the literacy strategies, but adapting them to their lives outside of the classroom. In addition, Johnston examines the complex learning that teachers produce in classrooms that is hard to name and thus is not recognized by tests, by policy-makers, by the general public, and often by teachers themselves, yet is vitally important. This book will be enlightening for any teacher who wishes to be more conscious of the many ways their language helps children acquire literacy skills and view the world, their peers, and themselves in new ways.

This brief rhetoric helps students develop strategies for critical reading, critical thinking, research, and writing that will help them argue clearly and convincingly. It teaches them to identify and develop arguments, to read and form reactions and opinions of their own, to analyze an audience, to seek common ground, and to

use a wide, realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues. It includes clear explanations and examples of argument theory and reading and writing processes, research and documentation skills, and offers engaging, class-tested writing assignments and activities. 49 Essays for Analysis cover several broad issue and sub-issue areas, all of contemporary concern. Unique chapters discuss student argument styles, Rogerian argument, and argument and literature.

Writing Argumentative Essays Corwin Press

Because everything is an argument "In this book, we'll argue that you can teach the writing of argument so that students will not only exceed the Common Core State Standards, but also be prepared for a future as students and citizens." Michael Smith, Jeffrey Wilhelm, and James Fredricksen The Common Core State Standards are an argument that "students' ability to write sound arguments on substantive topics and issues . . . is critical to college and career readiness." This book is an argument. Oh, Yeah?! will persuade you that it is an ideal resource for helping you teach argument writing to adolescents. And not just any arguments, but the kinds of substantive ones the

real-world demands. "We believe," write Michael Smith, Jeffrey Wilhelm, and James Fredricksen, "that instruction directed to improve student performance on standards-based assessments MUST be the most powerful and engaging instruction we can possibly offer." To that end they fill *Oh, Yeah?!* with proven lessons for writing, reading, and discussing arguments that you can use right now. In addition, they provide ideas for how to create instructional contexts that maximize the power of those lessons through a compelling framework that will help you create your own lessons and units in the future. Life may be a series of arguments, but your decision about how to teach argument writing needn't be complicated. Trust Smith, Wilhelm, and Fredricksen, use *Oh, Yeah?!* in your classroom, and give students an argument for meeting-and exceeding-the Common Core standards.
