A considerable amount of public debate and media print has been devoted to the “ war between science and religion. ” In his accessible and eminently readable new book, Stephen M. Barr demonstrates that what is really at war with religion is not science itself, but a philosophy called scientific materialism. Modern Physics and Ancient Faith argues that the great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God, the cosmos, and the human soul than with the atheistic viewpoint of scientific materialism. Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century. These discoveries led many thoughtful people to the conclusion that the universe has no cause

or purpose, that the human race is an accidental by-product of blind material forces, and that the ultimate reality is matter itself. Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought. He uses five of these discoveries—the Big Bang theory, unified field theories, anthropic coincidences, G ö del ’ s Theorem in mathematics, and quantum theory—to cast serious doubt on the materialist ’ s view of the world and to give greater credence to Judeo-Christian claims about God and the universe. Written in clear language, Barr ’ s rigorous and fair text explains modern physics to general readers without oversimplification. Using the insights of modern physics, he reveals that modern scientific discoveries and religious faith are deeply consonant. Anyone with an interest in science and religion will find Modern Physics and Ancient Faith invaluable. New from Best-Selling Author John Piper From Genesis to Revelation, the providence of God directs the entire course of redemptive history. Providence is “ God ’ s

purposeful sovereignty.” Its extent reaches down to the flight of electrons, up to the movements of galaxies, and into the heart of man. Its nature is wise and just and good. And its goal is the Christ-exalting glorification of God through the gladness of a redeemed people in a new world. Drawing on a lifetime of theological reflection, biblical study, and practical ministry, pastor and author John Piper leads us on a stunning tour of the sightings of God ’ s providence—from Genesis to Revelation—to discover the all-encompassing reality of God ’ s purposeful sovereignty over all of creation and all of history. Piper invites us to experience the profound effects of knowing the God of all-pervasive providence: the intensifying of true worship, the solidifying of wavering conviction, the strengthening of embattled faith, the toughening of joyful courage, and the advance of God ’ s mission in this world.

'You want to know who gave you your immortal soul? You want a personal relationship with God? Well, we found God. We're all up in God. We've got God's private number. And so do you: imprinted a hundred trillion times – once in every living cell in your big dripping corpus.' So says a woman with a pole-axe pressed to her neck, and the solution to the entire mystery of human existence clutched between her palms. Two weeks earlier, she was just your average British expat with a PhD, working in Silicon Valley as an artificial intelligence designer for ultra-violent video games, spending the evenings hanging out with her pet chimp – and wondering how something as weird as human consciousness could have evolved through mere Darwinian selection. But when a mysterious and disconcertingly attractive behavioural geneticist, and a hotshot cryptologist with strange religious affiliations, stroll into her life, she begins looking for answers in the backwaters of the human genome – the 97% written off by scientists as ;junk DNA;. And soon after, when men in very strange hats come looking for her hard drive, shooting first and never really asking any questions, she finds herself on the run – pursued by multiple squads of heavily-armed religious zealots, the Feds, and worse. All seek to obtain, or to suppress forever, the key to the revelatory stretch of DNA known as The Pandora Sequence. The outcome of their race to control this explosive secret will forever alter how humanity regards itself - that is, if anyone lives long enough to tell the tale.
