This regulation encompasses garrison, field, and subsistence supply operations. Specifically, this regulation comprises Army Staff and major Army command responsibilities and includes responsibilities for the Installation Management Command and subordinate regions. It also establishes policy for the adoption of an à la carte dining facility and for watercraft to provide subsistence when underway or in dock. Additionally, the regulation identifies DOD 7000.14 – R as the source of meal rates for reimbursement purposes; delegates the approval authority for catered meals and host nation meals from Headquarters, Department of the Army to the Army commands; and authorizes the use of the Government purchase card for subsistence purchases when in the best interest of the Government. This regulation allows prime vendors as the source of garrison supply and pricing and provides garrison menu standards in accordance with The Surgeon General's nutrition standards for feeding military personnel. Also, included is guidance for the implementation of the U.S. Department of Agriculture Food Recovery Program.

An essential guide to the calibrated risk analysis approach The Failure of Risk Management takes a close look at misused and misapplied basic analysis methods and shows how some of the most popular "risk management" methods are no better than astrology! Using examples from the 2008 credit crisis, natural disasters, outsourcing to China, engineering disasters, and more, Hubbard reveals critical flaws in risk management methods—and shows how all of these problems can be fixed. The solutions involve combinations of scientifically proven and frequently used methods from nuclear power, exploratory oil, and other areas of business and government. Finally, Hubbard explains how new forms of collaboration across all industries and government can improve risk management in every field. Douglas W. Hubbard (Glen Ellyn, IL) is the inventor of Applied Information Economics (AIE) and the author of Wiley's How to Measure Anything: Finding the Value of Intangibles in Business (978-0-470-11012-6), the #1 bestseller in business math on Amazon. He has applied innovative risk assessment and risk management methods in government and corporations since 1994. "Doug Hubbard, a recognized expert among experts in the field of risk management, covers the entire spectrum of risk management in this invaluable guide. There are specific value-added take aways in each chapter that are sure to enrich all readers including IT, business management, students, and academics alike" —Peter Julian, former chief-information officer of the New York Metro Transit Authority. President of Alliance Group consulting "In his trademark style, Doug asks the tough questions on risk management. A must-read not only for analysts, but also for the executive who is making critical business decisions." —Jim Franklin, VP Enterprise Performance Management and General Manager, Crystal Ball Global Business Unit, Oracle Corporation.

Every day in the United States, over two million men, women, and children step onto an aircraft and place their lives in the hands of strangers. As anyone who has ever flown knows, modern flight offers unparalleled advantages in travel and

freedom, but it also comes with grave responsibility and risk. For the first time in its history, the Federal Aviation Administration has put together a set of easy-to-understand guidelines and principles that will help pilots of any skill level minimize risk and maximize safety while in the air. The Risk Management Handbook offers full-color diagrams and illustrations to help students and pilots visualize the science of flight, while providing straightforward information on decision-making and the risk-management process.

Welcome to the Army Mountain Warfare School (AMWS). During this course, you will receive some of the finest training the US Army has to offer. Our instructors are ready to pass on knowledge gained from years of experience and multiple combat deployments. While you are here, our first concern is for your safety. For this reason, you must be totally focused and maintain situational awareness at all times. 2. Operating in the mountains presents two distinct yet related challenges; first is the severe affects that weather and the environment have on personnel and equipment and second thes evere impact the terrain has on unit mobility. How well you solve these tactical problems will directly affect your ability to take the fight to the

enemy in level two and three terrain. The skills you learn here at AMWS are tools to help you and your unit solve these challenges. 3. In the mountains of Afghanistan we face an adaptive, clever enemy who uses the harsh environment to his advantage to operate against us. With specialized mountain warfare training and equipment we can use that same terrain to our advantage and seize the initiative away from the enemy. 4. Untrained and unprepared, the mountain environment can be your worst enemy. Properly trained and equipped, it can be your strongest ally. We will give you the training. The rest is up to you. *Tactical Display for Soldiers* United States Department of Defense

This book examines the human factors issues associated with the development, testing, and implementation of helmet-mounted display technology in the 21st Century Land Warrior System. Because the framework of analysis is soldier performance with the system in the full range of environments and missions, the book discusses both the military context and the characteristics of the infantry soldiers who will use the system. The major issues covered include the positive and negative effects of such a display on the local and global situation awareness of the individual soldier, an analysis of the visual and psychomotor factors associated with each design feature, design considerations for auditory displays, and physical sources of stress and the implications of the display for affecting the soldier's workload. The book proposes an innovative approach to research and testing based on a three-stage strategy that begins in the laboratory, moves to controlled field studies, and culminates in operational testing.

A comprehensive guide to the process of applying and earning your commission. Are you a former soldier, sailor, or airman who left the service without making the most of your potential? Are you a leader in the civilian sector who knows you have more to give back to the country you love? If so, you should consider entering the Army, Army Reserves, or Army National Guard, earn your commission as a Second Lieutenant, and begin or restart an exciting career as a leader in the world's best military. The Ultimate Officer Candidate School Guidebook explains everything you need to know to achieve these goals. Earning the right to become a US Army officer is an honor and a privilege, and the deck is stacked against those over twenty-five because of the rigorous, time-consuming training. However, you can attend OCS to earn a commission as a Second Lieutenant if you: are between eighteen and forty have an undergraduate degree from an accredited college have or can attain a minimum GT score of 110 can pass an Army Physical Fitness Test Getting accepted to OCS is not automatic, and your choice of when and where to enter is limited. Federal OCS, held at Fort Benning, Georgia, and the many state traditional and fast-track programs offer potential officer candidates a choice about how and when to earn their commission. In this book, an OCS graduate and former TAC Officer offers nineteen chapters of information to guide potential candidates down the path of earning a commission in the Army. It covers everything from the application process, to stressors from TAC officers while attending OCS, to deciding what branch to choose upon earning your

---

commission. It even includes pages with pre-made terrain model kits to assist you while attending OCS, for those who are serious about leadership and finishing strong. Are you up to the challenge?
