Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to

---

develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in

Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

This book is written to support those who care for the well-being of their community. It is for anyone who wants to be part of creating an organization, neighborhood, city, or country that works for all, and who has the faith and the energy to create such a place. I am one of those people. Whenever I am in a neighborhood or small town and see empty storefronts, watch people floating aimlessly on the sidewalks

during school or working hours, pass by housing projects, or read about crime, poverty, or a poor environment in the places where our children and our brothers and sisters live, I am distressed and anguished. It has become impossible for me to ignore the fact that the world we are creating does not come close to fulfilling its promise. Along with this distress comes the knowledge that each of us, myself included, is participating in creating this world. If it is true that we are creating this

world, then each of us has the power to heal its woundedness. This is not about guilt, it is about accountability. Citizens, in their capacity to come together and choose to be accountable, are our best shot at making a difference. This book is for all who are willing to take a leadership role that affirms the conviction that without a willingness to be accountable for our part in creating a strong and connected community, our desire to reduce suffering and increase

---

happiness in the world becomes infinitely more difficult to fulfill. It is also based on the belief that in some way the vitality and connectedness of our communities will determine the strength of our democracy. ----From 'Community'

HVAC Training 101 is a site visited by over 100,000

enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a

retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to [HVACTraining101.Com](http://HVACTraining101.Com) to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started

getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to

---

becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Classic Books Library presents this brand new edition of “ The Federalist Papers ” , a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “ The Federalist ” , as it was previously known, was constructed by American statesman Alexander Hamilton,

and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755 – 1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation ’ s finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the

Dr. King ’ s best-selling account of the civil rights movement in Birmingham during the spring and summer of 1963 On April 16, 1963, as the violent events of the Birmingham campaign unfolded in the city ’ s streets, Dr. Martin Luther King, Jr., composed a letter from his prison cell in response to local religious leaders ’ criticism of the campaign. The resulting piece of extraordinary protest writing, “ Letter from Birmingham Jail, ” was widely circulated and published in numerous periodicals. After the conclusion of the campaign and the March

---

on Washington for Jobs and Freedom in 1963, King further developed the ideas introduced in the letter in *Why We Can't Wait*, which tells the story of African American activism in the spring and summer of 1963. During this time, Birmingham, Alabama, was perhaps the most racially segregated city in the United States, but the campaign launched by King, Fred Shuttlesworth, and others demonstrated to the world the power of nonviolent direct action. Often applauded as King's most incisive and eloquent book, *Why We Can't Wait* recounts the Birmingham campaign in vivid detail, while underscoring why 1963 was such a crucial year for

the civil rights movement. Disappointed by the slow pace of school desegregation and civil rights legislation, King observed that by 1963—during which the country celebrated the one-hundredth anniversary of the Emancipation Proclamation—Asia and Africa were “moving with jetlike speed toward gaining political independence but we still creep at a horse-and-buggy pace.” King examines the history of the civil rights struggle, noting tasks that future generations must accomplish to bring about full equality, and asserts that African Americans have already waited over three centuries for civil rights and that it is time to be proactive:

“For years now, I have heard the word ‘Wait!’ It rings in the ear of every Negro with piercing familiarity. This ‘Wait’ has almost always meant ‘Never.’ We must come to see, with one of our distinguished jurists, that ‘justice too long delayed is justice denied.’”

Over the last few years, IBM® IMSTM and IMS tools have been modernizing the interfaces to IMS and the IMS tools to bring them more in line with the current interface designs. As the mainframe software products are becoming more integrated with the Windows and mobile environments, a common approach to interfaces is becoming more relevant. The traditional 3270 interface with ISPF as the main interface is no

longer the only way to do some of these processes. There is also a need to provide more of a common looking interface so the tools do not have a product-specific interface. This allows more cross product integration. Eclipse and web-based interfaces being used in a development environment, tooling using those environments provides productivity improvements in that the interfaces are common and familiar. IMS and IMS tools developers are making use of those environments to provide tooling that will perform some of the standard DBA functions. This book will take some selected processes and show how this new tooling can be used. This will

---

provide some productivity improvements and also provide a more familiar environment for new generations DBAs. Some of the functions normally done by DBA or console operators can now be done in this eclipse-based environment by the application developers. This means that the need to request these services from others can be eliminated. This IBM Redbooks® publication examines specific IMS DBA processes and highlights the new IMS and IMS tools features, which show an alternative way to accomplish those processes. Each chapter highlights a different area of the DBA processes like: PSB creation Starting/stopping a database in an IMS system
