The purpose of this field manual (FM) is to provide doctrine and training procedures for unit field sanitation teams (FST). In addition, a training program in the application of personal protective measures (PPM) is included for personnel appointed as members of the FST for each company, troop, or battery. This publication contains a proposed 20-hour master training schedule which may be adjusted as necessary; a text that may serve as reference material for the FST instructor; and supporting illustrations for the instructors assigned the training task. This publication provides guidance to the commanders, unit leaders, and soldiers for implementing unit field sanitation and preventive medicine (PVNTMED) measures in the field. This publication is written to further aid the commander and his unit leaders in the continuing effort of reducing the disease and nonbattle injury (DNBI) rates during deployments. This publication provides information on PPM for the unit FST on applying unit-level PPM. This publication implements or is in consonance with the following North Atlantic Treaty Organization (NATO) International Standardization Agreements (STANAGs), American, British, Canadian, and Australian (ABCA) Quadripartite Standardization Agreements (QSTAGs) and Quadripartite Advisory Publications issued by the Washington Standardization Officers.

This United States Army manual, Army Techniques Publication ATP 4-42 Materiel Management, Supply, and Field Services Operations November 2020, provides supply personnel, logisticians, and leaders information on materiel management, distribution management, supply support, and field services support. It focuses on how staffs, supply units, and field services units support large-scale combat operations, incorporating themes from FM 3-0 and FM 4-0. It also addresses the Army Health System's medical logistics function specifically focusing on class VIII materiel management. This supply and services functions manual provides information on what Soldiers at the tactical, operational, and strategic levels need to know to make supply and field services support decisions. This manual describes the supply support process from an enterprise perspective, but it does not dwell on a single commodity or automated system. Of the field service functions it addresses only shower and laundry operations in detail as aerial delivery, field feeding, mortuary affairs, and water purification are covered in depth in separate Army techniques publications (ATPs). This publication addresses force health protection as it relates to preventive medicine and veterinary services support to class I materiel management, field hygiene, and sanitation as it relates to provision of field services. It also addresses the Army Health System's medical logistics function, to include a brief introduction to the medical units, with a focus on the class VIII supply support mission. Trainers and educators throughout the Army will also use this publication. The principal audience for ATP 4-42 is all members of the profession of arms. Commanders and staffs of Army headquarters serving as joint task force or multinational headquarters should also refer to applicable joint or multinational doctrine concerning the range of military operations of these forces. ATP 4-42 applies to the Active Army, Army National Guard/Army National Guard of the United States, and United States Army Reserve unless otherwise stated.

This indispensable practitioner guide and text serves as a comprehensive primer on case formulation within all of the major therapeutic approaches. Prominent experts offer step-by-step guidelines for developing strong formulations and putting them to use in day-to-day practice. The chapters follow a standard format to allow comparison across models. Coverage includes the conceptual and empirical underpinnings of each approach, the relationship of case formulation to therapeutic technique, issues in treating clients from different backgrounds and with different types of presenting problems, and training resources. Illustrative case material and user-friendly examples of completed formulations are featured throughout.

U.S. Army First Aid Manual

"Unit Field Sanitation Team," is to provide doctrine and training procedures for unit field sanitation teams (FST). In addition, a training program in the application of personal protective measures (PPM) is included for personnel appointed as members of the FST for each company, troop, or battery. Army Techniques Publication 4-25.12 remains generally consistent with Field Manual 4-25.12 on key topics while adopting updated terminology and concepts as necessary. These topics include discussion of operational and mission variables which commanders must consider when determining the need for more trained field sanitation teams to support the Soldiers when deploying. The material presented in this publication reflects enduring practices of basic field hygiene and sanitation and preventive medicine measures. Implementation of these techniques and procedures enable commanders to preserve the health of their Soldiers in order for them to accomplish their mission.

Field Sanitation in Contingency Operations

Excerpt from Elements of Field Hygiene and Sanitation One of the important subjects with which newly commissioned officers must acquaint themselves is the care of troops. Disease has killed more soldiers than powder and shot, and has occasioned the defeat of many armies. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
