The field manual provides a standardized source document for Army-wide reference on map reading and land navigation. It applies to every soldier in the army regardless of service branch, MOS, or rank. This manual also contains both doctrine and training guidance on map reading and land navigation. Part One addresses map reading and Part Two, land navigation. The appendices include an introduction to orienteering and a discussion of several devices that can assist the soldier in land navigation. For soldiers, hunters, climbers, and hikers alike, this is the definitive guide to map reading and navigation.

A Guide for Decision Makers Simon and Schuster

This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include virtual and combinations of classroom and other media delivery methods. The ibstpi instructor competencies match up well to Mapping the Future (Bernthal, Colteryahn, Davis, Naughton, Rothwell, & Wellins 2004), the current ASTD competency study of the field now known as Workplace Learning and Performance (WLP) and previously known as Training and Development (T&D). WLP is more than a new name for an old subject and represents a fundamental paradigm shift in what it means to be a professional in the field formerly known as training. WLP is all about getting improved performance -- and therefore improved results -- in organizational settings through planned and unplanned learning interventions. Instruction is thus a means to an end and not an end in itself. The ibstpi instructor competencies dovetail well with that philosophy.

The Curriculum Topic Study (CTS) process, funded by the US National Science Foundation, helps teachers improve their practice by linking standards and research to content, curriculum, instruction, and assessment. Key to the core book Science Curriculum Topic Study, this resource helps science professional development leaders and teacher educators understand the CTS approach and how to design, lead, and apply CTS in a variety of settings that support teachers as learners. The authors provide everything needed to facilitate the CTS process, including: a solid foundation in the CTS framework; multiple designs for half-day and full-day workshops, professional learning communities, and one-on-one instructional coaching; facilitation, group processing, and materials management strategies; and a CD-ROM with handouts, PowerPoint slides, and templates. By bringing CTS into schools and other professional development settings, science leaders can enhance their teachers' knowledge of content, improve teaching practices, and have a positive impact on student learning.

The United States Army in Afghanistan is a powerful story of the first military efforts to strike back at the terrorist organization al Qaeda in the aftermath of its 9/11 attacks on the World Trade Center and the Pentagon. Al Qaeda's leader, Osama bin Laden, believed he and his followers living and training under the protection of the Taliban regime in the far-off mountains of Afghanistan were beyond the reach of American arms. Richard W. Stewart in his penetrating essay on the early critical months of Operation ENDURING FREEDOM proves that bin Laden was wrong, chronicling how American, coalition, and allied Afghan units in a matter of months overthrew the Taliban regime and drove the al Qaeda into worldwide flight. His well-balanced story of American resolve, of danger and hardship, and of ultimate victory during the opening days of the Global War on Terrorism is worthy of study, providing critical perspective on how conventional and unconventional forces not only complemented each other's strengths but also compensated for each other's weaknesses.

Map Reading and Land Navigation Gale, Cengage Learning

Throughout history, military leaders have recognized the importance of reconnaissance and surveillance. Gaining and maintaining contact with the enemy is essential to win the battle, and U.S. military history contains many examples where our knowledge of the enemy, or lack of knowledge, directly led to victory or defeat. The role of reconnaissance and surveillance has not diminished on the modern battlefield; if anything, it has become even more important. Battles at the combat training centers prove that a good reconnaissance and surveillance effort is critical to successful attacks. On the other hand, a poor reconnaissance and surveillance effort almost guarantees defeat for the commander. The message is clear: success on the battlefield begins with reconnaissance and surveillance. Direct from the United States Army, U.S. Army Reconnaissance and Surveillance Handbook provides tactics, techniques, and procedures for reconnaissance and surveillance planning, mission management, and reporting. It also covers the development of intelligence to support counter-reconnaissance operations, employment considerations for reconnaissance, and surveillance assets, and defines the roles of various personnel in planning operations. Intended for maneuver commanders and their staffs; intelligence staffs and collection managers; and other personnel involved in planning and reconnaissance and counter-reconnaissance operations, and now available to everyone, U.S. Army Reconnaissance and Surveillance Handbook provides an insider's look into the world of Army intelligence.

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

Running barefoot isn't as natural as we're led to believe. Recent studies have shown that up to 85% of runners get injured every year, how natural is that? The most important question that running "barefoot" or "naturally" doesn't address is how we should run. Repetitive ground impact forces are at the root of most running injuries. A 30 minute jog can log more than 5,000 foot strikes; its because of this volume of movement that efficient

"I've been told that losing a child is the hardest event a person will ever have to endure. I get why they say this. Death is hard enough to accept, even when a person who has lived a full life dies of old age. When we think someone was 'taken before their time,' it's even harder. And it truly is difficult to lose a child. I mean, mind-numbing, soul-scrubbing hard. Trust me." — from Not My Will At once vulnerable and compelling, this artfully crafted spiritual memoir offers fresh hope, challenge and inspiration in the midst of crushing grief.

A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.
