The Essential Guide to the Cameraman's Craft Since its initial publication in 1973, Cinematography has become the guidebook for filmmakers. Based on their combined fifty years in the film and television industry, authors Kris Malkiewicz and M. David Mullen lay clear and concise groundwork for basic film techniques, focusing squarely on the cameraman's craft. Readers will then learn step-by-step how to master more advanced techniques in postproduction, digital editing, and overall film production. This completely revised third edition, with more than 200 new illustrations, will provide a detailed look at: How expert camera operation can produce consistent, high-quality results How to choose film stocks for the appearance and style of the finished film How to measure light in studio and location shooting for the desired appearance How to coordinate visual and audio elements to produce high-quality sound tracks Whether the final product is a major motion picture, an independent film, or simply a home video, Cinematography can help any filmmaker translate his or her vision into a quality film.

Color and Mastering for Digital Cinema explores the implications for motion picture post production processes and changes required to the supporting equipment and software. While a new concept to the motion picture community, the selection of the wide gamut, output-referred XYZ color space for digital cinema distribution is based on decades of color science and experience in other industries. The rationale for choosing XYZ and the other color encoding parameters is explained and the book also provides a full case study of the development of DLP Cinema® projectors by Texas Instruments.

Finally, this book explores how the XYZ color encoding concept can be extended to support enhanced display technologies in the future. This book contains: * Brilliant 4-color illustrations that compliment the color science explanations * Never before published industry information from author Glenn Kennel, a world leader in digital cinema color technology * Descriptions of key issues and background on decisions that were made in the standardization process By Glenn Kennel, Glenn Kennel is VP/GM of Feature Film Services at Laser Pacific Media Corporation, a leading provider of a full range of post production services for television and feature film. Recently, he worked for the DLP Cinema group of Texas Instruments in a role that included technology and business development. Previously, in a twenty year career with Kodak, he led the development of the Cineon digital film scanners and laser recorders and the prototype HDTV telecine that became the Spirit Datacine. As a consultant, he helped DCI draft the technical specifications for digital cinema. Kennel also chairs the SMPTE DC28 Color ad hoc group and the DC28.20 Distribution working group. He is a SMPTE Fellow and has received the SMPTE Journal Award. He is also a member of the Academy of Motion Picture Arts and Sciences.

Readers of Mike Uva's GRIP BOOK who are interested in more detailed information on the work of the grip department will welcome his new rigging manual, clearly detailing all the ways to mount cameras and lights both on a set as well as on location. The book covers the latest truss systems, rigging equipment and portable stages, as well as lifts, boom arms and camera mounts for every type of moving vehicle. The book is not limited to equipment specifications, however; Uva offers tips and tricks throughout in order to make the process of setting up and shooting safer and more efficient. Grips often need to invent makeshift solutions in a short time, and Uva shares many such devices

developed over his years in the film and TV industry. This book will help grips and key grips move on to the bigger feature projects and commercials that require this equipment. It will also be useful for directors of photography and producers in pre-planning the required equipment for specific shots.

A Complete Professional Handbook Taylor & Francis

This spirited volume explores the history and diversity of improvisation in the cinema, including works by Jean Renoir, Jean-Luc Godard, and Nobuhiro Suwa. Gilles Mouëllic examines improvisational practices that can be specifically attributed to the cinema and argues in favor of their powers as instigators of unprecedented forms of expression. Improvising Cinema reflects both on the permanence of attempting improvisation and the relationship between technology and aesthetics. Mouëllic concludes preservation becomes even more invaluable in the case of improvisation, as the creative act exists only within the brief time span of the performance.

100 Great War Movies: The Real History Behind the Films Taylor & Francis

Most books about film production assume that you have an idea and a script to shoot. Most screenwriting books are geared to how to write a script that you can sell to Hollywood (as though the authors of these books had the slightest clue) and do not take into consideration that you might be shooting the script yourself, possibly with your own money. This book is about how to write a script properly that you can rationally shoot, how to shoot it, how to finish it, how to sell it, and also how to get it shown.
