Since its publication in 2004, *Civil Society* has become a standard work of reference for all those who seek to understand the role of voluntary

citizen action in the contemporary world. In this thoroughly-revised edition, Michael Edwards updates the arguments and evidence presented in the original and adds major new material on issues such as civil society in Africa and the Middle East, global civil society, information technology and new forms of citizen organizing. He explains how in the future the pressures of state encroachment, resurgent individualism, and old and familiar forces of nationalism and fundamentalism in new clothes will test and re-shape the practice of citizen action in both positive and negative ways. Civil Society will help readers of all persuasions to navigate

these choppy waters with greater understanding, insight and success. Colleges and universities, foundations and NGOs, public policy-makers, journalists and commissions of inquiry – all have used Edwards’s book to understand and strengthen the vital role that civil society can play in deepening democracy, re-building community, and addressing poverty, inequality and injustice. This new edition will be required reading for anyone who is interested in creating a better world through citizen action. *Real-Time Rendering, Fourth Edition* Taylor & Francis

The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of

each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally

appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.
