Art Across Time Cengage Learning

With over 1780 entries, Szabo and Kuefler offer the largest and most heavily annotated bibliography on the Tapestry ever written.

Artists and Migration

1400-1850 Springer Nature

"In this book, Gregory Salter traces how artists represented home and masculinities in the period of social and personal reconstruction after the Second World War in Britain. Salter considers home as an unstable entity at this historical moment, imbued with the optimism and hopes of post-war recovery while continuing to resonate with the memories and traumas of wartime. Artists examined in the book include John Bratby, Francis Bacon, Keith Vaughan, Francis Newton Souza and Victor Pasmore. Case studies featured range from the nuclear family and the body, to the nation. Combined, they present an argument that art enables an understanding of post-war

reconstruction as a temporally unstable, long-term phenomenon which placed conceptions of home and masculinity at the heart of its aims. Art and Masculinity in Post-War Britain sheds new light on how the fluid concepts of society, nation, masculinity and home interacted and influenced each other at this critical period in history and will be of interest to anyone studying art history, anthropology, sociology, history and cultural and heritage studies."--

Art across Time

Volume One Scarecrow Press

When white Europeans first encountered Native American cultures, they often regarded Indian ideas about the earth and the spiritual world as evidence of their ignorance and primitive society. Now,

---

traditional Indian wisdom that emphasizes the importance of maintaining balance within specific places is especially valuable and relevant as we grapple with sweeping environmental changes.

**Art Across Time** Art across Time Combined GARDNER'S ART THROUGH THE AGES: BACKPACK EDITION, BOOK C: NON-WESTERN ART TO 1300 is part of an easy-to-carry six-volume set. The most widely-read history of art and architecture in the English language for over 85 years, this beautifully-illustrated set includes new features that make it easier than ever for your students to master the material. Author and award-winning scholar-teacher Fred Kleiner has

set a new standard for art history textbooks, continuing GARDNER'S tradition of impeccable reliability and scholarship. The 14th Edition includes a new chapter dedicated to contemporary art worldwide (Books E & F), coverage of over 300 new images, new pedagogical features, images that have been upgraded for clarity and color-fidelity, and more. A comprehensive, integrated set of digital resources brings course content to life, providing students with the tools they need to excel in your class, regardless of their learning styles. GARDNER's has built its stellar reputation on the inclusion of the most significant images, discussions of the images in their full historical and cultural contexts, reproductions of unsurpassed quality,

---

scholarship that is up-to-date, the consistent voice of a single storyteller, and more online help for students and instructors than any other art survey text. Over 100 reviewers, all experts in their fields, contributed to the accuracy of this edition. CourseMate, the online learning environment that can be used on its own or as an LMS-specific course cartridge, provides an interactive experience for exploration, study, and development of critical thinking skills. It includes an interactive eBook, all images included within the text, nearly 300 videos, audio resources, image flashcards, a printable Slide Guide for note-taking, and much more. Dynamic lecture tools will save instructors time in preparing for class -- a Digital Image Library with full zoom

capabilities, side-by-side comparisons, and Google Earth integration. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Classical Art* Routledge Looking and Listening: Conversations between Modern Art and Music invites the art and music lover to place these two realms of creative endeavor into an open dialog. Although the worlds of music and visual art often seem to take separate paths, they are usually parallel.

Conductor and art connoisseur Brenda Leach takes unique pairings of well-known visual art works and musical compositions from the twentieth century to identify the shared sources of inspiration, as well as similarities in theme, style, and technique, to explore the

---

historical and cultural influences on the great artists and composers in the twentieth century. Looking and Listening asks and answers: What does jazz have in common with paintings by Stuart Davis and Piet Mondrian? How did Gershwin's Rhapsody in Blue affect the work of artist Arthur Dove? How did painter Georgia O'Keeffe and composer Aaron Copland capture the spirit of a youthful America entering the twentieth century? What did Kandinsky and Schoenberg share in their artistic visions? Leach takes readers on a whirlwind tour of the lives of these artists, surveying many of the key movements in the twentieth century by comparing representative works from the modern masters of the visual arts and music. Leach's refreshing and innovative approach will interest those passionate about twentieth-century art and music and is

ideal for any student or instructor, museum docent, or music programmer seeking to draw the lines of connection between these two art forms.

[Essays on Health, Family, and Work Choices](#) Cengage Learning

Moving with the Magdalen is the first art-historical book dedicated to the cult of Mary Magdalen in the late medieval Alps. Its seven case study chapters focus on the artworks commissioned for key churches that belonged to both parish and pilgrimage networks in order to explore the role of

---

artistic workshops, commissioning patrons and diverse devotees in the development and transfer of the saint's iconography across the mountain range. Together they underscore how the Magdalen's cult and contingent imagery interacted with the environmental conditions and landscape of the Alps along late medieval routes.

*Art and Masculinity in Post-war Britain* John Wiley & Sons

From Picasso's Cubism and Duchamp's readymades to Warhol's silkscreens and Smithson's earthworks, the art of the twentieth century broke completely with earlier artistic traditions. A basic change in the market for advanced art produced a heightened demand for innovation, and young conceptual innovators – from Picasso and Duchamp to Rauschenberg and Warhol to Cindy Sherman and Damien Hirst –

responded not only by creating dozens of new forms of art, but also by behaving in ways that would have been incomprehensible to their predecessors.

*Conceptual Revolutions in Twentieth-Century Art* presents the first systematic analysis of the reasons for this discontinuity. David W. Galenson, whose earlier research has changed our understanding of creativity, combines social scientific methods with qualitative analysis to produce a fundamentally new interpretation of modern art that will give readers a far deeper appreciation of the art of the past century, and of today, than is available elsewhere.

*The Bayeux Tapestry*  
Bloomsbury Publishing USA  
Sound Art offers the first comprehensive introduction to sound art written for

---

undergraduate students. Bridging and blending aspects of the visual and sonic arts, modern sound art first emerged in the early 20th century and has grown into a thriving and varied field. In 13 thematic chapters, this book enables students to clearly grasp both the concepts behind this unique area of art, and its history and practice. Each chapter begins with an exploration of key ideas and theories, followed by an in-depth discussion of selected relevant works, both classic and current. Drawing on a broad, diverse range of examples, and firmly interdisciplinary, this book will be essential reading for anyone studying or teaching the theory, history, appreciation, or practice of sound art.

**Sound Art** Cambridge University Press

How did the statues of ancient Greece wind up dictating art history in the West? How did the material culture of the Greeks and Romans come to be seen as "classical" and as "art"?

What does "classical art" mean across time and place? In this ambitious, richly illustrated book, art historian and classicist Caroline Vout provides an original history of how classical art has been continuously redefined over the millennia as it has found itself in new contexts and cultures. All of this raises the question of classical art's future. What we call classical art did not simply appear in ancient Rome, or in the Renaissance, or in the eighteenth-century Academy. Endlessly repackaged and revered or rebuked, Greek and Roman artifacts have gathered an amazing array of values, both positive and negative, in each new historical period, even as these objects themselves have reshaped their surroundings. Vout shows how this process

---

began in antiquity, as Greeks of the Hellenistic period transformed the art of fifth-century Greece, and continued through the Roman empire, Constantinople, European court societies, the neoclassical English country house, and the nineteenth century, up to the modern museum. A unique exploration of how each period of Western culture has transformed Greek and Roman antiquities and in turn been transformed by them, this book revolutionizes our understanding of what classical art has meant and continues to mean.

The Tiny and the Fragmented

Princeton University Press

Book Description: 30,000 years of art -- one engaging guide.

Can't tell a Manet from a Monet? Not sure why you should want to? Let scholar and author Laurie

Adams introduce you to the story behind the history of art. Based on her art survey textbook of the same name, this edition of *Art Across Time* serves as an entertaining and readable introduction to the history of art. Providing biographical notes and historical context, Adams has created a vivid narrative. Each illustration has been carefully reviewed for color accuracy, and the large percentage of full-page reproductions presents a rare opportunity for readers to examine details of brushwork and texture that are lost in smaller images. All in all, this colorful book is an ideal gift that will compliment any library and interest any reader.

*Art of Suppression* Cengage Learning

This volume emphasizes the economic aspects of art and culture, a relatively new field that poses inherent problems for economics, with its quantitative concepts and tools. Building bridges across disciplines such as management, art history, art

---

philosophy, sociology, and law, editors Victor Ginsburgh and David Throsby assemble chapters that yield new perspectives on the supply and demand for artistic services, the contribution of the arts sector to the economy, and the roles that public policies play. With its focus on culture rather than the arts, Ginsburgh and Throsby bring new clarity and definition to this rapidly growing area. Presents coherent summaries of major research in art and culture, a field that is inherently difficult to characterize with finance tools and concepts Offers a rigorous description that avoids common problems associated with art and culture scholarship Makes details about the economics of art and culture accessible to scholars in fields outside economics

Italian Renaissance Art Newnes  
This book examines how modern Nigerian political institutions have grappled with the

resurgence of traditional institutions of political leadership in the post-colonial era. The contributors examine the role and nature of traditional governance institutions in West Africa from pre-colonial times to the post-colonial era. Part one considers a range of traditional institutions including monarchies, Islamic institutions and the role of culture and arts such as masking and music in traditional leadership. Part two focuses on modern governance institutions, elites, political action, arts, and democracy in post-colonial Nigeria. Part three examines democratic institutions and processes in Nigeria's Fourth Republic, covering issues such as electoral reform, women's political participation, and democratic citizenship. This book will be of interested to students and scholars of African politics, governance and democratization.

other readers new and meaningful ways of developing personal ideas and opinions about art and how to express them with confidence. Offers an inquiry—unique among introductory art texts—into the learning process of understanding and appreciating art Examines the multiple issues and processes essential to making, analyzing and evaluating art Uses cross-cultural examples to help readers develop comprehensive, yet personal, ways of looking at and thinking about art Includes an annotated glossary of the 'Art World', institutions and individuals that play a role in defining art as well as diagrams, textboxes callouts and other visual elements to highlight information and enhance learning Richly

illustrated with over 40 images Suggests innovative class assignments and projects useful for developing lesson plans, and offers an online companion site for additional illustrations and information

**How to Write Art History**  
Routledge

Dave Brubeck's *Time Out* ranks among the most popular, successful, and influential jazz albums of all time. Released by Columbia in 1959, alongside such other landmark albums as Miles Davis's *Kind of Blue* and Charles Mingus's *Mingus Ah Um*, *Time Out* became one of the first jazz albums to be certified platinum, while its featured track, "Take Five," became the best-selling jazz single of the twentieth century, surpassing one million copies. In addition to its

---

commercial successes, the album is widely recognized as a pioneering endeavor into the use of odd meters in jazz. With its opening track "Blue Rondo à la Turk" written in 9/8, its hit single "Take Five" in 5/4, and equally innovative uses of the more common 3/4 and 4/4 meters on other tracks, Time Out has played an important role in the development of modern jazz. In this book, author Stephen A. Crist draws on nearly fifteen years of archival research to offer the most thorough examination to date of this seminal jazz album. Supplementing his research with interviews with key individuals, including Brubeck's widow Iola and daughter Catherine, as well as interviews conducted with Brubeck himself prior to his passing

in 2012, Crist paints a complete picture of the album's origins, creation, and legacy. Couching careful analysis of each of the album's seven tracks within historical and cultural contexts, he offers fascinating insights into the composition and development of some of the album's best-known tunes. From Brubeck's 1958 State Department-sponsored tour, during which he first encountered the Turkish aksak rhythms that would form the basis of "Blue Rondo à la Turk," to the backstage jam session that planted the seeds for "Take Five," Crist sheds an exciting new light on one of the most significant albums in jazz history.

**Preserving Dance Across Time and Space** Cambridge University Press

Offering a unique blend of thematic and chronological investigation, this highly illustrated, engaging text explores the rich historical, cultural, and social contexts of 3,000 years of Greek art, from the Bronze Age through the Hellenistic period. Uniquely intersperses chapters devoted to major periods of Greek art from the Bronze Age through the Hellenistic period, with chapters containing discussions of important contextual themes across all of the periods. Contextual chapters illustrate how a range of factors, such as the urban environment, gender, markets, and cross-cultural

contact, influenced the development of art. Chronological chapters survey the appearance and development of key artistic genres and explore how artifacts and architecture of the time reflect these styles. Offers a variety of engaging and informative pedagogical features to help students navigate the subject, such as timelines, theme-based textboxes, key terms defined in margins, and further readings. Information is presented clearly and contextualized so that it is accessible to students regardless of their prior level of knowledge. A book companion website is available at [www.wiley.com/go/greekart](http://www.wiley.com/go/greekart) with the following resources: PowerPoint slides, glossary, and timeline. Introducing Aesthetics and the

---

Philosophy of Art Cambridge  
Scholars Publishing

This dissertation investigates how changes in policies, technology, and lifestyles affect individual's decisions about their health, well-being, and life choices. The dissertation primarily focuses on two questions within this topic: i) the effects of greater affordability of assisted reproductive technology (ART) on women's marriage and fertility timing decisions and ii) the effects of time spent working on individual's obesity and health status and the mechanisms contributing to these effects. In two chapters, I examine whether greater affordability of ART has impacted women's fertility and marriage choices. ART consists of medical technologies that help women and couples with fertility problems conceive a child using such methods as in-vitro fertilization (IVF). Since the

percentage of women facing infertility increases greatly with age, by making it affordable for women to delay family formation and then use ART to start families later if they face infertility, greater affordability of ART could induce women to delay marriage and childbearing. To formally identify channels through which greater affordability of ART might impact women's decisions about timing of family, I develop theoretical models of greater affordability of ART and women's allocation of time on work and family investment over the life course. To test the implications of the models, I utilize empirical strategies exploiting variation in the mandated insurance coverage of ART across U.S. states and over time. In the first chapter, I use linear probability models and the 1977-2010 Current Population Survey to examine the likelihood that women of

---

different ages with and without mandated insurance coverage of ART have ever been married in order to compute marriage rates between age groups, the differences in the likelihoods of having ever been married between one age group and the next. Results show that greater access to ART is associated with marital delay for white (but not for black) women. In the second chapter, to estimate a more precise analysis and examine channels for the effects on marriage, I perform survival and competing risks analyses using the 1986-2009 Panel Study of Income Dynamics to examine the effects of the mandates on the hazards of transitioning to first marriage and first birth for single and childless women, respectively. The findings of this research suggest that the mandates are associated with delayed marriage and childbearing at younger ages and speeded transition to marriage and motherhood after age 30, but only for college graduate women, consistent with the theoretical framework's prediction that women with steeper wage trajectories should be more influenced by the mandates to delay family formation. For the full sample of women, the mandates appear to be associated with speeded transition to marriage after age 25 and motherhood within marriage after age 30, but not with delay at younger ages. This research builds on the literature examining changes in women's marriage and fertility timing and on the literature investigating the effects of ART insurance mandates. This research is valuable for understanding the impacts of technology and policy as well as the factors impacting women's marriage and fertility timing. In the third chapter, I investigate mechanisms for the positive relationship between

---

time spent working and Body Mass Index (BMI). BMI might increase and health status might decline with more hours spent working since as leisure time declines, the opportunity cost of time rises, and it becomes more costly to undertake health-producing activities and receive medical care. Additionally, more time spent working would increase the incidence of detrimental effects of the workplace such as job-related stress, which would have a negative effect on health. This chapter uses the 2006, 2007, and 2008 American Time Use Surveys (ATUS) linked with Eating and Health module data to identify channels through which time spent working could affect BMI. While other datasets provide information on individuals' market work time, the ATUS also provides insight into individuals' non-market work activities. Linked with the Eating and Health module, it permits inference to be drawn about individuals' time use in a variety of activities as well as measures relating to eating and health, including BMI. Making use of this data, in this chapter I first replicate the results of other papers by estimating the effect of working time on BMI and find that increased working time is associated with a positive and significant effect on own BMI for both men and women. Then, to investigate the channels through which working time may impact BMI, I next estimate a series of equations to determine whether a variety of potential mediators significantly change the estimated effect of time spent working on own BMI. A number of the tested channels appear to mediate the effect of hours worked on BMI with strong significant effects found for exercise, active time, and screen time, and marginally significant effects found for

---

secondary eating and food preparation. No significant effects were found for primary eating, secondary drinking, grocery shopping, purchasing prepared food, sleeping, housework, commuting, or own medical care. These results suggest the main channels through which working hours could be related to BMI are related to physical activity. These findings suggest plausible mechanisms for the association between time spent working and obesity. This work contributes to the literature by using time use data to examine the effect of time spent working on BMI as well as by modeling the channels through which time use affects weight and health outcomes. While previous work has explored the effect of working time on BMI, this paper considers the effect of working time on various measures of time use to get a fuller picture of how work time

affects lifestyle choices that affect weight and health. This is valuable because recent research has found that there is a growing disparity in working hours between Americans and those in other industrialized countries, and the full consequences of increasing working hours are not explored in the literature and can have significant implications for labor and tax policy. Further, to prescribe effective policy interventions, it is necessary to know the channels through which any effects are arising. This work contributes to the literature by investigating the potential eating, health investment, and physical activity channels driving the positive relationship between working time and BMI to obtain a fuller picture of how work time affects lifestyle choices that affect weight and health. This is valuable because as Americans transition to more sedentary

---

jobs, the full consequences of increased work hours in those jobs are not explored in the literature and can have significant implications for labor and tax policy. Accordingly, the paper provides insights useful for designing effective policy interventions aiming to reduce obesity prevalence. This research has examined questions related to individuals' health and life choices with relevant policy implications. Recent decades have seen significant changes in the roles of and opportunities for women and associated changes in lifestyle and the family, and this dissertation explores the effects of these changes. The findings of this research suggest that women have responded to lower prices of infertility treatment with higher educated women delaying marriage and child bearing, and it could be the case that these invest more

time when younger in education and work. In addition, the research suggests that increased time spent working may be associated with an increase in BMI driven by allocating less time to physical activity. These results suggest that changes in technology and lifestyle over recent decades have had real effects on individuals' life choices and health. Conceptual Revolutions in Twentieth-Century Art Wadsworth Publishing Company Today, it often seems as though Assisted Reproductive Technologies (ARTs) have reached a stage of normalization, at least in some countries and among certain social groups. Apparently some practices – for example in vitro fertilization (IVF) – have become standard worldwide. The contributors to Assisted Reproduction Across Borders argue against normalization as an uncontested overall trend. This volume reflects on the state of the art of

---

ARTs. From feminist perspectives, the contributors focus on contemporary political debates triggered by ARTs. They examine the varying ways in which ARTs are interpreted and practised in different contexts, depending on religious, moral and political approaches. *Assisted Reproduction Across Borders* embeds feminist analysis of ARTs across a wide variety of countries and cultural contexts, discussing controversial practices such as surrogacy from the perspective of the global South as well as the global North as well as inequalities in terms of access to IVF. This volume will appeal to scholars and students of anthropology, ethnography, philosophy, political science, history, sociology, film studies, media studies, literature, art history, area studies, and interdisciplinary areas such as gender studies, cultural studies, and postcolonial studies.
