The Cross in Tradition, History and Art Routledge

Aesthetics and the philosophy of art are about things in the world – things like the Mona Lisa, but also things like horror movies, things like the ugliest dog in the world, and things like wallpaper. There's a surprising amount of philosophical content to be found in wallpaper. Using a case-driven approach, *Introducing Aesthetics and the Philosophy of Art* is grounded in

real-world examples that propel thought, debate, and discussion about the nature of art and beauty. Now in its third edition, this tried-and-tested text features fresh cases and new activities. Hands-on Do Aesthetics! activities pepper the text, and Challenge Cases appear at the end of each chapter to test intuitions, to complicate the field of discussion, and to set a path forward. Charlotte Perkins Gilman's "The Yellow Wall-Paper" serves as a recurring case throughout, and this edition includes the full text of this classic short story. From classical debates that continue to bother philosophers today, to emerging problems of identity, appropriation, and morality, this introduction is designed to engage you in a field that itself engages with so much of the world around you. Here is everything you need to know about the history, themes, thinkers and theories to get you started on aesthetics and the philosophy of art. *Italian Renaissance Art* McGraw-Hill Education Miniature and fragmentary objects are both eye-catching and yet easily dismissed. Tiny scale entices users with visions of Lilliputian worlds. The ambiguity of fragments intrigues us, offering tactile reminders of reality's transience. Yet, the standard scholarly approach to such objects has been to see them as secondary, incomplete things, whose principal purpose was to refer to a complete and often life-size whole. The *Tiny and the Fragmented* offers a series of fresh perspectives on the familiar concepts of the tiny and the fragmented. Written by a prestigious group of internationally-acclaimed scholars, the volume presents a remarkable diversity of case studies that range from Neolithic Europe to pre-Colombian Honduras to the classical Mediterranean and ancient Near East. Each scholar takes a different approach to issues of miniaturization and fragmentation but is united in considering the little and broken things of the past as objects in their own right. Whether a life-size or whole thing is made in a scaled-down form, deliberately broken as part of its use, or only considered successful in the eyes of ancient users if it shows some signs of wear, it challenges our expectations of representation and wholeness, of what it means for a work of art to be "finished" and "affective." Overall, *The Tiny and the Fragmented* demands a reconsideration of the social and contextual nature of

miniaturization, fragmentation, and incompleteness, making the case that it was because of, rather than in spite of, their small or partial state that these objects were valued parts of the personal and social worlds they inhabited.

From Picasso's Cubism and Duchamp's readymades to Warhol's silkscreens and Smithson's earthworks, the art of the twentieth century broke completely with earlier artistic traditions. A basic change in the market for advanced art produced a heightened demand for innovation, and young conceptual innovators – from Picasso and Duchamp to Rauschenberg and Warhol to Cindy Sherman and Damien Hirst – responded not only by creating dozens of new forms of art, but also by behaving in ways that would have been incomprehensible to their predecessors. *Conceptual Revolutions in Twentieth-Century Art* presents the first systematic analysis of the reasons

for this discontinuity. David W. Galenson, whose earlier research has changed our understanding of creativity, combines social scientific methods with qualitative analysis to produce a fundamentally new interpretation of modern art that will give readers a far deeper appreciation of the art of the past century, and of today, than is available elsewhere.

Gardner's Art Through the Ages McGraw-Hill Humanities, Social Sciences & World Languages

What is the purpose of a work of art? What drives us to make art? Why do we value art and consume it? Nick Zangwill argues that we cannot understand the nature of art without first having answers to these fundamental questions. On his view, which he dubs 'the Aesthetic Creation Theory', a work of art is something created for a particular aesthetic purpose. More specifically, the function of art is to have certain aesthetic properties in virtue of its non-aesthetic properties, and this function arises because of the artist's insight into the nature of these dependence relations and her intention to bring them about. In defending this view, Zangwill provides an account of aesthetic action and aesthetic creative thought and shows how the Aesthetic Creation Theory can accommodate two kinds of seeming counterexamples to aesthetic theories of art: narrative art and twentieth-century avant-garde art. Aesthetic Creation also contains a detailed exposition and critique of a range of rival views, including Dickie's institutional theory of art, accounts of art that make essential reference to an audience, and sociological theories which purport to explain the nature of art without recourse to the notion of the aesthetic.

Art and the Form of Life Oxford University Press

Art and the Form of Life takes a classic theme—philosophy as the art of living—and gives it a contemporary twist. The book examines a series of watershed moments in artistic practice alongside philosophers' most enduring questions about the way we live. Coupling Tino Sehgal with Wittgenstein, cave art with Foucault, Stanley Kubrick with Nietzsche, and the Bauhaus with Walter Benjamin, the book animates the idea that life is literally ours to make. It reflects on universal themes that connect the long histories of art and philosophy, and it does so using a contemporary approach. Drawing on great philosophical works, it argues that life practiced as an art form affords an experience of meaning, in the sense that it is engaging, creative, and participatory. It thus effects a fundamental renewal of experience.
