John Bogle puts our obsession with financial success in perspective Throughout his legendary career, John C. Bogle-founder of the Vanguard Mutual Fund Group and creator of the first index mutual fund-has helped investors build wealth the right way and led a tireless campaign to restore common sense to the investment world. Along the way, he's seen how destructive an obsession with financial success can be. Now, with Enough., he puts this dilemma in perspective. Inspired in large measure by the hundreds of lectures Bogle has delivered to professional groups and college students in recent years, Enough. seeks, paraphrasing Kurt Vonnegut, "to poison our minds with a little humanity." Page by page, Bogle thoughtfully considers what "enough" actually means as it relates to money, business, and life. Reveals Bogle's unparalleled insights on money and what we should consider as the true treasures in our lives Details the values we should emulate in our business and professional callings Contains thought-provoking life lessons regarding our individual roles in society Written in a straightforward and accessible style, this unique book examines what it truly means to have "enough" in world increasingly focused on status and score-keeping.

The Cambridge History of Science: Volume 1, Ancient Science Puffin

In this thrilling reimaging of ancient Greek mythology, a headstrong girl becomes the most powerful fighter her people have ever seen. Seventeen-year-old Daphne has spent her entire life honing her body and mind into that of a warrior, hoping to be accepted by the unyielding people of ancient Sparta. But an unexpected encounter with the goddess Artemis--who holds Daphne's brother's fate in her hands--upends the life she's worked so hard to build. Nine mysterious items have been stolen from Mount Olympus and if Daphne cannot find them, the gods' waning powers will fade away, the mortal world will descend into chaos, and her brother's life will be forfeit. Guided by Artemis's twin--the handsome and entirely-too-self-assured god Apollo--Daphne's journey will take her from the labyrinth of the Minotaur to the riddle-spinning Sphinx of Thebes, team her up with mythological legends such as Theseus and Hippolyta of the Amazons, and pit her against the gods themselves. A reinterpretation of the classic Greek myth of Daphne and Apollo, Daughter of Sparta by debut author Claire Andrews turns the traditionally male-dominated mythology we know into a heart-pounding and empowering female-led adventure.

The Making of the Modern Refugee proposes a new approach to a fundamental aspect of twentieth-century history by bringing the causes, consequences and meanings of global population displacement within a single frame. Its broad chronological and geographical coverage, extending from Europe and the Middle East to South Asia, South-East Asia and sub-Saharan Africa, makes it possible to compare crises and how they were addressed. Wars, revolutions and state formation are invoked as the main causal explanations of displacement, and are considered alongside the emergence of a twentieth-century refugee regime linking governmental practices, professional expertise and humanitarian relief efforts. How and for whom did refugees become a "problem" for organizations such as the League of Nations and UNHCR and for non-governmental organizations (NGOs)? What solutions were entertained and implemented, and why? What were the implications for refugees? These questions invite us to consider how refugees engaged with the myriad ramifications of enforced migration, and thus the significance that they attached to the places they left behind, to their journeys and destinations--in short, how refugees helped interpreted and fashioned their own history. The Making of the Modern Refugee rests upon scholarship from several disciplines and draws upon oral testimony, eye-witness accounts and cultural production, as well as extensive unpublished source material.

Why Athens? Oxford University Press

Cosmeceuticals and Active Cosmetics discusses the science of nearly two dozen cosmeceuticals used

today. This third edition provides ample evidence on specific cosmeceutical substances, their classes of use, skin conditions for which they are used, and points of interest arising from other considerations, such as toxicology and manufacturing. The book discusses both cosmetic and therapeutic uses of cosmeceuticals for various conditions including rosacea, dry skin, alopecia, eczema, seborrheic dermatitis, purpura, and vitiligo. Active ingredients in the following products are discussed: caffeine, curcumin, green tea, Rhodiola rosea, milk thistle, and more. Also covered are topical peptides and proteins, amino acids and derivatives, antioxidants, vitamins E and C, niacinamide, botanical extracts, and biomarine actives. Providing ample scientific references, this book is an excellent guide to understanding the science behind the use of cosmeceuticals to treat a variety of dermatological conditions.

Antifungal Therapy CRC Press

When Artemis Fowl’s mother contracts a life-threatening illness, his world is turned upside down. The only hope for a cure lies in the brain fluid of the silky sifaka lemur. Unfortunately, the animal is extinct due to a heartless bargain Artemis himself made as a younger boy. Though the odds are stacked against him, Artemis is not willing to give up. With the help of his fairy friends, the young genius travels back in time to save the lemur and bring it back to the present. But to do so, Artemis will have to defeat a maniacal poacher, who has set his sights on new prey: Holly Short. The rules of time travel are far from simple, but to save his mother, Artemis will have to break them all...and outsmart his most cunning adversary yet: Artemis Fowl, age ten.

The European Union and Strategy Hyperion

This collection of essays reconsiders Greek tragedy as a reflection of Athenian political culture. The contributors explore the Athenianness of tragedy as the polyphonic discourse of tragedy; the presentation of Athens in some plays; tragedy as an Athenian form of choral performance and how family matters are presented.

This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.

Procedures and Protocols in the Neurocritical Care Unit McGraw Hill Professional

The goal of this book is twofold. On the one hand we want to offer a discussion of some of the more important properties of the nominal projection, on the other hand we want to provide the reader with tools for syntactic analysis which apply to the structure of DP but which are also relevant for other domains of syntax. In order to achieve this dual goal we will discuss phenomena which are related to the nominal projection in relation to other syntactic phenomena (e.g. pro drop will be related to N-ellipsis, the classification of pronouns will be applied to the syntax of possessive pronouns, N-movement will be compared to V-movement, the syntax of the genitive construction will be related to that of predicate inversion etc.). In the various chapters we will show how recent theoretical proposals (distributed morphology, anti-symmetry, checking theory) can cast light on aspects of the syntax of the NP. When necessary, we will provide a brief introduction of these theoretical proposals. We will also indicate problems with these analyses, whether they be inherent to the theories as such (e.g. what is the trigger for movement in antisymmetric approaches) or to the particular instantiations. The book cannot and will not provide the definitive analysis of the syntax of noun phrases. We consider that this would not be possible, given the current flux in generative syntax, with many new theoretical proposals being developed and explored, but the book aims at giving the reader the tools with which to conduct research and to evaluate proposals in the literature. In the discussion of various issues, we will apply the framework that is most adequate to deal with

problems at hand. We will therefore not necessarily use the same approach throughout the discussion. Though proposals in the literature will be referred to when relevant, we cannot attempt to provide a critical survey of the literature. We feel that such a survey would be guided too strongly by theoretical choices, which would not be compatible with the pedagogical purposes this book has. The book is comparative in its approach, and data from different languages will be examined, including English, German, Dutch (West-Flemish), Greek, Romance, Semitic, Slavic, Albanian, Hungarian, Gungbe.

Urban Design the American Experience Jon Lang Urban Design: The American Experience places social and environmental concerns within the context of American history. It returns the focus of urban design to the creation of a better world. It evaluates the efforts of designers who apply knowledge about the environment and people to the creation of livable, enjoyable, and even inspiring built worlds. Urban Design: The American Experience emphasizes that urban design must take a user-oriented approach to achieve a higher quality of life in human settlements. All the keys to this approach are spelled out in chapters that address: Urban design as both a product and process of communal decision-making Types of knowledge required as a base for urban design action How to apply recent environmental and behavioral research to professional design How human needs are fulfilled through design The true role of functionalism in design Urban design efforts of the twentieth century in the United States are examined within their socio-political context. Jon Lang reviews the urban design experience from the beginning of the "City Beautiful" movement, paying particular attention to developments since World War II. He explores how the twentieth-century city has developed, as well as discusses the attitudes that have driven major movements in urban design. Readers learn a neo-Modernist approach that builds on the successes and failures of Rationalism and Empiricism, the two major streams of Modernist thought in architecture and urban design. They also gain an understanding of how the environment is experienced by people, and the implications of this experiencing for architectural and urban design. Numerous illustrations throughout demonstrate how various design schemes can be used. Urban Design: The American Experience provides architects, designers, city planners, and students in these fields with a

model for their own future development as professionals. It is a valuable guide to design methodology (procedural theory) and other issues related to creating optimal urban environments.

"Violence against women undermines women's core fundamental rights such as dignity, access to justice and gender equality. For example, one in three women has experienced physical and/or sexual violence since the age of 15; one in five women has experienced stalking; every second woman has been confronted with one or more forms of sexual harassment. What emerges is a picture of extensive abuse that affects many women's lives but is systematically underreported to the authorities. The scale of violence against women is therefore not reflected by official data. This FRA survey is the first of its kind on violence against women across the 28 Member States of the European Union (EU). It is based on interviews with 42,000 women across the EU, who were asked about their experiences of physical, sexual and psychological violence, including incidents of intimate partner violence ('domestic violence'). The survey also included questions on stalking, sexual harassment, and the role played by new technologies in women's experiences of abuse. In addition, it asked about their experiences of violence in childhood. Based on the detailed findings, FRA suggests courses of action in different areas that are touched by violence against women and go beyond the narrow confines of criminal law, ranging from employment and health to the medium of new technologies."--Editor.

Tag, an exceptional young human living in Central City on the planet Earth, tries to keep his powerful, singular skills undetected by leading an ordinary life and staying under the radar. But one day, on the way home from school, Tag's compassion leads him to make a decision that alters the course of his life - and history. The Alliance of Worlds, which includes Earth as a ruled non-member, has decided that humans are to be annihilated as an example to anyone who discovers an ancient alien technology, even though there is no proof against them. The Alliance thinks fifty thousand warships can do the job. Unfortunately, the humans are not cooperating with the plan and one young human who has fallen in love will change everything... In this epic story, author Saxon Andrew takes us into the future and lives of human and nonhuman characters alike. Along with battles and spaceships, this story offers humor and a tale of enduring love against the backdrop of a grand-scale galactic war.

This book explains how to use intravitreal steroids optimally in the management of patients with intraocular inflammation (uveitis) and macular edema. The rationale for this treatment approach is first explained by examining the pathophysiology of these disease entities, with particular attention to the major role of inflammatory processes. Devices for the delivery of steroids to the eye are discussed, and guidance provided on the role of imaging studies before, during, and after steroid therapy. The value of different steroidal approaches is then considered in detail. Other topics addressed include the use of steroids as a surgical adjunct and within a combination strategy. Uveitis and macular edema are common sight-threatening diseases or complications of diabetes and retinal vein occlusion for which no adequate treatment was available until recently. Both trainees and practitioners will find Intravitreal Steroids to be an invaluable aid in combating these blinding diseases.
