On a searing summer Friday, Eddie Chapman has been stuck for hours in a traffic jam. There are accidents along the highway, but ambulances and police are conspicuously absent. When he decides to abandon his car and run home, he sees that the trees along the edge of a stream have been burnt, and the water in the streambed is gone. Something is very wrong. When he arrives home, the power is out and there is no running water. The pipes everywhere, it seems, have gone dry. Eddie and his wife, Laura, find themselves thrust together with their neighbors while a sense of unease thickens in the stifling night air. Thirst takes place in the immediate aftermath of a mysterious disaster--the Chapmans and their neighbors suffer the effects

of the heat, their thirst, and the terrifying realization that no one is coming to help. As violence rips through the community, Eddie and Laura are forced to recall secrets from their past and question their present humanity. In crisp and convincing prose, Ben Warner compels readers to do the same. What might you do to survive?

Imagine a distant future where technology's inexorable advance has halted for all but the richest .1% of humanity. Indigents who still have it fly spaceships that are hundreds of years old, and entreat the help of robots that are relics of the past. The wealthy, having achieved immortality through science, and secured total power through purchase of all government seats, spread and consume the last resources of the cosmos. The unlucky majority pursue one goal: The generational commitment to buying a ticket into Utopia—the virtual reality program that simulates what in antiquity was known as heaven. Little do they question the mysterious origin and purpose of their gloried destination. For those who can't afford to upload their consciousnesses into Utopia, and leave their

physical bodies forever behind, there are few options but to live the life of an outlaw. Eight hundred years in the past, Mick Compton is ripped away through a wormhole into the dystopian future of the Messier 82 galaxy. In a place where the only thing that matters is getting into paradise, he wants only to get back home to his proper place and time, to his wife and family, so that he can right the wrongs of his past. But Sera, a battle-hardened smuggler with plans of her own for him, won't make it so easy. And a darker agenda is at play in M82—the terrorist known as The Force of Darkness has reached a terrifying conclusion: Humanity is a virus, whose chance at equilibrium with its environment long ago failed. The only solution is complete extermination of mankind. After decades of surreptitious construction, FOD is nearly ready to detonate a quantum black hole with the power to consume the entire spread of the human race. Will Mick succumb to the draw of Utopia and forsake his desire to return to a real family? Will FOD pull off the ultimate terrorist act and destroy humanity once and for all? Find out in *Black Hull*.
