Teacher learning doesn't end with initial preparation; many insights and skills remain to be added. This book is concerned with ongoing teacher learning, its goals (Part I) and pathways (Part II). It is based on a longitudinal study of 42 teachers: 20 over their first 8 years of teaching and 22 over their first 5 years. The areas of continued teacher learning identified in our study were: vision of teaching, program planning, assessment, relevance, subject content and pedagogy, classroom organization and community, inclusion, and professional identity. The pathways of learning included informal and formal PD, teacher inquiry, and school-based learning. A key finding of our research was that, over the years, teachers learn a great deal informally. However, they do so largely on their own and under considerable stress. Teachers need

more support than they currently receive, both for survival and to enhance their informal learning. Teachers can benefit significantly from external input, but their everyday learning makes them key "experts" in teaching. Accordingly, PD providers should work with teachers, utilizing their existing knowledge. This book is written for consideration by teachers, student teachers, teacher educators, PD providers, policy developers, and others interested in facilitating teacher learning. Some of us have been writing – somewhat desperately – on these ideas for years. Beck and Kosnik have given us strong evidence that the ideas are effective in practice. I hope this persuasive and beautifully written book will be widely read. Nel Noddings, Lee Jacks Professor of Education Emerita, Stanford University This book makes a powerful case for taking teachers' professional development seriously. It brings us the voices of beginning teachers as they deepen their professional knowledge over time and makes clear the depth of commitment they bring to the job. Educators want young people to grow up knowing that writing is an important and deeply satisfying life skill, one that helps them make more sense of themselves and their world, and one that helps them to communicate effectively. Sadly, too often writing becomes merely an exercise in 'getting words right', or writing to teacher-prescribed tasks.

No other system combines these learning strategies in the same way and no other system has been able to demonstrate more effective learning results. The children are happier, they learn faster and their teachers and parents are amazed at how

much more quickly these students learn to read than other students who are taught with other outmoded, traditional teaching methods. Today's classrooms present a variety of challenges for teachers, many of which result from unanticipated, unpredictable events, from minor to serious. This collection of teacher narratives highlights several of these challenges with subsequent reflections and commentaries that invite conversations about aspects of teaching that often remain unacknowledged in educator preparation programs but that can have deleterious effects on the implementation of the pedagogical content knowledge that is promoted in these programs.
Thinking Like a Teacher: Preparing New Teachers for Today's Classrooms aims to address this gap in educator preparation programs through sharing and affirming teachers' voices as sources of pedagogical knowledge. Engagement with the narratives included in this collection will help teacher candidates perceive and think about teaching in new ways as they make the transition from instructional consumers to instructional leaders while simultaneously forging a new professional identity.

Some American children do not realize how blessed they are to have so many educational choices. There are more than 3,000 universities and colleges in the United States offering every subject from Architecture to Zoology. An average American student needs only the will to study and the zeal to accomplish and the sky is the limit. Some students do not explore the educational opportunities presented to them. They let the pressures of educational demands overwhelm them and many drop out of school for personal reasons. For many foreign students like me, the choices are limited and the road to success ranges from

slim to none. The obstacles are many and strenuous and they include; financial problems, home sickness, culture shock, weather adjustment, Immigration Department concerns, loneliness and the list goes on. In the mist of these problems quitting is not an option. There are two goals, the will to survive and succeed because this opportunity may not be available again. My story is based on the " will " to survive and accomplish a dream. How did I survive? Find out when you read, All I wanted was an Education; the Epic of a foreign Student.
