## Cancer Free: Your Guide to Gentle, Non-toxic Healing (Fifth Edition) Saunders

The events that took place on September 11th caused Dr. John Brighton, a naturopathic health

consultant, to ask himself questions about what role natural forms of healing might have in a scenario involving weapons of mass destruction (WMD). As he examined the issues and the nature of the threat, he felt assured that a naturalistic approach could make a significant contribution in conjunction with that offered by conventional medicine. Moreover, he felt that to use both would provide a more powerful deterrent than if either were used alone. The naturalistic approach would augment the use of drugs by adding 5 extra lines of defense aimed at supporting and strengthening the immune system to deal with such a dire event. These lines include: A psychological dimension A social dimension A preventative dimension An environmental dimension A specific dimension The whole idea of this holistic strategy is to employ prevention and immune-enhancing factors in order to reduce the level of crisis to begin with. As a result, the dependency on antibiotics (there are no effective antivirals) and other valuable medical resources can be considerably reduced, and, most importantly, preserved for when they would be needed most. Another benefit of integrating these two systems would add what Dr. Brighton calls "synergistic complexity" as a way to reduce the current crisis of germ resistance to many most potent antibiotics and to provide a holistic approach to all forms of WMD. The book clarifies the scope of the threat we face by examining: The variety of biological, chemical, and nuclear threats The factors involved in the creation of WMD The uncanny capacity of

microbes to develop resistance to our medications The threat of bioengineering and the creation of superbugs How synergistic complexity could provide a possible solution A chapter is dedicated to focusing on the specific nature and challenges posed by each biological, chemical and nuclear agent. This includes: A description of the agent How it causes harm How it might be used as a weapon, and the possibility of it being used diagnostically and in the field The conventional method of care and treatment The suggested natural forms of defense including herbs, vitamins & minerals, and other natural substances and healing therapies. The book ends with a forward-looking chapter on emerging technologies that have promise of increasing our level of defense against WMD. A bibliography and a full section on resources are available.

“ A fascinating, thoughtful, and accessible account of the emerging field of electromedicine. A timely and eloquent warning on the hazards of electronic pollution. ” —Jeremy Rifkin, author of *The Hydrogen Economy* At the same time that exciting insights about electromedicine ' s powerful ability to use the body ' s inherent healing abilities are emerging, electromagnetic fields radiating from power lines, radar, microwave ovens, VDTs, satellites, radios, and even electric blankets are putting our health at serious risk. Researchers are finding that this radiation correlates with increases in cancer, birth defects, depression, learning disabilities, chronic fatigue syndrome, Alzheimer ' s, AIDS, and sudden infant death syndrome. In this groundbreaking book, Robert O Becker explains how new and nontraditional healing techniques such as acupuncture, homeopathy, visualization, hypnosis, and electrotherapy work through an invisible common source—the body ' s electrical system. He also offers practical ways to protect ourselves in our homes and offices from the hazardous effects of electromagnetic

pollution and teaches us how to engage the healing energies of electromagnetism. Dr. Becker ' s powerful synthesis reshapes the future of medicine by putting life energy into our medical perspective and enabling us to see the body in its total living environment—the earth ' s electromagnetic field.

This research anthology explores the concept of food production and supply, from farm gate to plate, bringing together contemporary thinking and research on local, national, and global issues from a stakeholder perspective. *A Stakeholder Approach to Managing Food* includes a number of sections to represent these challenges, opportunities, conflicts, and cohesions affecting relevant stakeholder groups within food production and supply and their reaction to, engagement with, and co-creation of the food environment. For some, local, national, and global interests may seem at odds. We are in an era of growing and pervasive multi-national corporations, and these corporations have significant influence at all levels. Rapidly growing economies such as China are a focus for the global brand, but is this a scenario of adaptation or homogenization of food? Alongside this trend toward national and global development in food, this volume presents the counter-reaction that is taking place (especially in developed countries) toward local speciality and culturally bound foods,

with emphasis on the importance of the inter-connection of local communities and agri-food culture and economy. With an in-depth analysis of agricultural businesses, this book shows that the entrepreneurial spirit is alive and well in rural communities with often renewed and engaged connection with consumers and imaginative use of new media. This book will be of interest to students, researchers and policy-makers concerned with agriculture, food production and economics, cultural studies.

In 1984 I was advised by the medical profession that I had maybe three years left of my life, last August 2006 I had my 78th birthday, feeling 50 years young through my discovery of Colloidal Silver - THE NATURAL ANTIBIOTIC. In May 1917 Sir Malcom Morris K.C.V.O. Wrote in the British medical Journal, Under the heading:

"THE AFFECTION OF COLLOIDAL PREPARATIONS" This results (from Colloidal Silver) which make it an obvious duty to suggest that trials on a large scale ought to be given to this form of medication which promises to affect a Pharmacological revolution. It acts with a singular rapidly, free of disadvantages, inseparable from the same drugs in an ordinary state, and its extensive use would affect an enormous economy on drug consumption.
