**Celestial Navigation** Legare Street Press

All the techniques you need to become an expert navigator.

**Geo Info Systems Apress**

Celestial navigation can be a daunting and intimidating subject for some to learn. There are many comprehensive books on the subject which I recommend, but the beginning student can be overwhelmed by the vast amount of information in these texts. To initially learn celestial navigation, sometimes less is more. By clearing a path through the esoteric details and providing just enough information with concise explanations, simple visual aids and examples, learning celestial navigation becomes easier and more enjoyable. The goal of this booklet is to serve as a launch pad into the subject which may be all that many yachtsmen need. For those who want to learn more, this booklet will prepare you for more in-depth studies. Includes full-color 3-D illustrations. Forward by John Kretschmer

14th International Symposium on Process Systems Engineering, Volume 49 brings together the international community of researchers and engineers interested in computing-based methods in process engineering. The conference highlights the contributions of the PSE community towards the sustainability of modern society and is based on the 2021 event held in Tokyo, Japan, July 1-23, 2021. It contains contributions from academia and industry, establishing the core products of PSE, defining the new and changing scope of our results, and covering future challenges. Plenary and keynote lectures discuss real-world challenges (globalization, energy, environment and health) and contribute to discussions on the widening scope of PSE versus the consolidation of the core topics of PSE. Highlights how the Process Systems Engineering community contributes to the sustainability of modern society Establishes the core products of Process Systems Engineering Defines the future challenges of Process Systems Engineering

ASPEN PLUS® Comprehensive resource covering Aspen Plus V12.1 and demonstrating how to implement the program in versatile chemical process industries Aspen Plus®: Chemical Engineering Applications facilitates the process of learning and later mastering Aspen Plus®, the market-leading chemical process modeling software, with step-by-step examples and succinct explanations. The text enables readers to identify solutions to various process engineering problems via screenshots of the Aspen Plus® platforms

in parallel with the related text. To aid in information retention, the text includes end-of-chapter problems and term project problems, online exam and quiz problems for instructors that are parametrized (i.e., adjustable) so that each student will have a standalone version, and extra online material for students, such as Aspen Plus®-related files, that are used in the working tutorials throughout the entire textbook. The second edition of Aspen Plus®: Chemical Engineering Applications includes information on: Various new features that were embedded into Aspen Plus V12.1 and existing features which have been modified Aspen Custom Modeler (ACM), covering basic features to show how to merge customized models into Aspen Plus simulator New updates to process dynamics and control and process economic analysis since the first edition was published Vital areas of interest in relation to the software, such as polymerization, drug solubility, solids handling, safety measures, and energy saving For chemical engineering students and industry professionals, the second edition of Aspen Plus®: Chemical Engineering Applications is a key resource for understanding Aspen Plus and the new features that were added in version 12.1 of the software. Many supplementary learning resources help aid the reader with information retention.

The rules of business are changing dramatically. The Aspen Institute's Judy Samuelson describes the profound shifts in attitudes and mindsets that are redefining our notions of what constitutes business success. Dynamic forces are conspiring to clarify the new rules of real value creation—and to put the old rules to rest. Internet-powered transparency, more powerful worker voice, the decline in importance of capital, and the complexity of global supply chains in the face of planetary limits all define the new landscape. As executive director of the Aspen Institute Business and Society Program, Judy Samuelson has a unique vantage point from which to engage business

decision makers and identify the forces that are moving the needle in both boardrooms and business classrooms. Samuelson lays out how hard-to-measure intangibles like reputation, trust, and loyalty are imposing new ways to assess risk and opportunity in investment and asset management. She argues that “ maximizing shareholder value ” has never been the sole objective of effective businesses while observing that shareholder theory and the practices that keep it in place continue to lose power in both business and the public square. In our globalized era, she demonstrates how expectations of corporations are set far beyond the company gates—and why employees are both the best allies of the business and the new accountability mechanism, more so than consumers or investors. Samuelson's new rules offer a powerful guide to how businesses are changing today—and what is needed to succeed in tomorrow's economic and social landscape.
