folders in your application. The big window in the middle is where you edit your code and spend most of your time.

### Web Applications with ASP.NET Core Architecture and ...

The best part about ASP.NET MVC is the loose coupling it provides between Views, Models, and Controllers. This enables the application developer to develop more maintainable, testable, and flexible applications. With this in mind let us see what should be put where to get the best out of the ASP.NET MVC application architecture.

### Standard Application

### Architecture In MVC

ASP.NET MVC has been around for eight years and a lot of ASP.NET developers have embraced the new technology and shown what it's capable of in their own web apps. While most developers were used to WebForms and Microsoft's stock controls (i.e. ListView and DataGrid), when developers moved to ASP.NET MVC, a number of developers were shocked because there wasn't enough meat for this to be a full ...
