On August 6, 1945, the B-29 Enola Gay dropped an atomic bomb on Hiroshima, Japan, which ushered on the end of World War II. For the 50th anniversary of this major event in world history, the National Air and Space Museum of the Smithsonian Institution produced an exhibit. A controversy erupted, however, over the exhibit's historical authenticity. Veterans, for example, complained that the museum displayed a misrepresented version of history. After concisely covering the background of the Enola Gay and its mission, this study focuses on the controversy surrounding the museum exhibit. Issues covered include casualty figures, ethical questions, and political correctness, among others. The viewpoints of such groups as museum personnel, exhibit organizers, veterans, and historians are covered. Appendices offer information on content analysis of the National Air and Space Museum exhibit script, non-museum materials that were intended to complement the exhibit script, and the importance of full disclosure in research.

This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7)

Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)

Living with Cerebral Palsy correlates studies made in early life in patients with cerebral palsy with the status and social adjustment of the same individuals when they become adult.

This book discusses the problem of fitting handicapped patients for life in the community after leaving school. Organized into eight chapters, this book begins with an overview of the fate of patients suffering from cerebral palsy once they outgrow childhood and come to seek employment or vocation in adult life. This text then examines the classification of cerebral palsy. Other chapters consider the likelihood of the handicapped being able to work in open employment or sheltered conditions, or of being unemployable. This book discusses as well information about personal relationships and social life of patients. The final chapter deals with the prevalence of cerebral palsy and the types of cerebral palsy encountered in a given community. This book is a valuable resource for teachers, social workers, therapists, psychologists, and physicians.

Forensic mental health assessment (FMHA) continues to develop and expand as a specialization. Since the publication of the First Edition of Forensic Mental Health Assessment: A Casebook over a decade ago, there have been a number of significant changes in the applicable law, ethics, science, and practice that have shaped the conceptual and empirical underpinnings of FMHA. The Second Edition of Forensic Mental Health Assessment is thoroughly updated in light of the developments and changes in the field, while still keeping the unique structure of presenting cases, detailed reports, and specific teaching points on a wide range of topics. Unlike anything else in the literature, it provides genuine (although disguised) case material, so trainees as well as legal and mental health professionals can review how high-quality forensic evaluation reports are written; it features contributions from leading experts in forensic psychology and psychiatry, providing samples of work in their particular areas of specialization; and it discusses case material in the larger context of broad foundational principles and specific teaching points, making it a valuable resource for teaching, training, and continuing education. Now featuring 50 real-world cases, this new edition covers topics including criminal responsibility, sexual offending risk evaluation, federal sentencing, capital sentencing, capacity to consent to treatment, personal injury, harassment and discrimination, guardianship, juvenile commitment, transfer and decertification, response style, expert testimony, evaluations in a military context, and many more. It will be invaluable for anyone involved in assessments for the courts, including psychologists, psychiatrists, social workers, and attorneys, as well as for FMHA courses.

Health Assessment for Nursing Practice, 7th Edition focuses on what you need to know, providing easy-to-understand guidelines for an effective physical examination as well as preparation for the Next Generation NCLEX® Examination (NGN). New to this edition is a greater emphasis on normal findings and less on abnormal findings, new LGBTQ+ Considerations boxes, and new NGN Exam-style case studies. Written by noted nursing educators Susan Fickertt Wilson and Jean Foret Giddens, this book has everything you need to conduct and document an accurate assessment, succeed on the NGN, and prepare for clinical practice. Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, students can personalize the text to match their unique needs! Straightforward, easy-to-understand coverage gives you the essential knowledge and confidence to perform an effective health assessment and physical examination. Clear differentiation between basic skills and advanced skills helps you separate basic procedures from those that would be performed by an advanced practitioner or only in special circumstances. Proven two-column format links assessment techniques with normal and abnormal findings. Full-color photos and illustrations demonstrate how to perform key assessment techniques. UNIQUE! Concept Overview boxes present core concepts in the context of health assessment. UNIQUE! Clinical Reasoning boxes provide insight by explaining the thought process of an experienced nurse making a clinical decision. Patients with Situational Variations sections address special circumstances or needs of patients who are hearing impaired, in wheelchairs, or have other limitations. Documenting Expected Findings sections demonstrate how to chart normal findings, including documentation in the electronic health record. Case Studies at the end of each chapter give subjective and objective data about a patient and ask you to use clinical judgment skills to answer questions. Health Assessment Across the Life Span unit contains four chapters that cover the examination of patients of different ages, including older adults, pregnant patients, infants, children, and adolescents. Synthesis and Application of Health Assessment unit provides guidelines for combining the body system assessments into one comprehensive examination, for

communicating the findings to other health care professionals, and for adapting the assessment to patients in a hospital setting.
