Forensic mental health assessment (FMHA) continues to develop and expand as a specialization. Since the publication of the First Edition of *Forensic Mental Health Assessment: A Casebook* over a decade ago, there have been a number of significant changes in the applicable law, ethics, science, and practice that have shaped the

conceptual and empirical underpinnings of FMHA. The Second Edition of *Forensic Mental Health Assessment* is thoroughly updated in light of the developments and changes in the field, while still keeping the unique structure of presenting cases, detailed reports, and specific teaching points on a wide range of topics. Unlike anything else in the literature, it provides genuine (although disguised) case material, so trainees as well as legal and mental health professionals can review how high-quality forensic evaluation reports are written; it features contributions from leading experts in forensic psychology and psychiatry, providing samples of work in their particular areas of specialization; and it discusses case material in the larger context of broad foundational principles and specific teaching points, making it a valuable resource for teaching, training,

and continuing education. Now featuring 50 real-world cases, this new edition covers topics including criminal responsibility, sexual offending risk evaluation, federal sentencing, capital sentencing, capacity to consent to treatment, personal injury, harassment and discrimination, guardianship, juvenile commitment, transfer and decertification, response style, expert testimony, evaluations in a military context, and many more. It will be invaluable for anyone involved in assessments for the courts, including psychologists, psychiatrists, social workers, and attorneys, as well as for FMHA courses. *Histories of Everyday Life* Elsevier Health Sciences This comprehensive, easy-to-read, full-color textbook is a standard in physical assessment that features a holistic approach and a strong nursing perspective.

On August 6, 1945, the B-29 Enola Gay dropped an atomic bomb on Hiroshima, Japan, which ushered on the end of World War II. For the 50th anniversary of this major event in world history, the National Air and Space Museum of the Smithsonian Institution produced an exhibit. A controversy erupted, however, over the exhibit's historical authenticity. Veterans, for example, complained that the museum displayed a misrepresented version of history. After concisely covering the background of the Enola Gay and its mission, this study focuses on the controversy surrounding the museum exhibit. Issues covered include casualty figures, ethical questions, and political correctness, among others. The viewpoints of such groups as museum personnel, exhibit organizers, veterans, and historians are covered. Appendices offer information on content analysis of the National Air and Space Museum exhibit script, non-museum materials

that were intended to complement the exhibit script, and the importance of full disclosure in research.
