Build the skills needed to apply prioritization, delegation, and assignment concepts to nursing practice! Providing a solid foundation in coordinated care, Prioritization, Delegation, and Assignment in LPN/LVN Nursing uses practical exercises to prepare you for the Next-Generation NCLEX-PN® (NGN) examination and to boost your job readiness. It helps you develop clinical judgment skills by guiding you through patient care scenarios progressing from common to complex. NGN-style questions are included in the book, and the Evolve website allows you to answer all of the book's questions in interactive Study or Exam mode. Written by a team of noted educators led by Linda A. LaCharity, this text helps LPNs and LVNs apply decision-making concepts in many different settings. UNIQUE! Three-part organization first establishes foundational knowledge and then provides exercises with health scenarios of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. Evidence-based guidelines and treatment protocols reflect the latest research studies and best practices. Variety of question types and case studies prepare you for the Next-Generation NCLEX-PN® exam's new question formats and new focus on critical thinking. Practice quizzes on the Evolve website include all of the book's questions and allow you to create a virtually unlimited number of practice sessions or tests in Study Mode or Exam Mode. Focus on coordinated care addresses the NCLEX-PN's heavy emphasis on prioritization, delegation, and patient assignment. **ICEL2013-Proceedings of the 8th International Conference on e-Learning** Springer
EdPsych Modules uses an innovative modular approach and case studies based on real-life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct, stand-alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of case studies written for early childhood, elementary, middle, and secondary classrooms, providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity, emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status, and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules, and expanded coverage of diversity in new diversity-related research. This title is accompanied by a complete teaching and learning package. Quarterly Review of Distance Education IAP

Writing Assignments Across the University Curriculum as a whole asks and answers these questions: What kinds of documents do students write in a wide range of university degree programs in Canada? How do instructors structure those writing assignments? That is, who is the audience for the assignments? Do students get formative feedback as they develop their documents? Do the patterns we found in a small liberal arts college (Graves, Hyland, and Samuels 2010) occur in other kinds of universities? We took our cue from an article by Anson and Dannels (2009) who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program. Consequently, we needed to map the writing assignments according to how different departments organized these degree programs. Results that were organized by curricular unit (departments, faculties or colleges, or programs/units) were more significant than general statistics because students would progress through these courses to a degree. Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering, Education, and an entire small university. The last two chapters report on the instructors perspective on their assignments: what they were intending to do, and why they both resisted and engaged in curricular discussions. The Z notation has been developed at the Programming Research Group at the Oxford University Computing Laboratory and elsewhere for over a decade. It is now used by industry as part of the software (and hardware) development process in both Europe and the USA. It is currently undergoing BSI standardisation in the UK, and has been proposed for ISO standardisation internationally. In recent years researchers have begun to focus increasingly on the development of techniques and tools to encourage the wider application of Z and other formal methods and notations. This volume contains papers from the Seventh Annual Z User Meeting, held in London in December 1992. In contrast to previous years the meeting concentrated specifically on industrial applications of Z, and a high proportion of the participants came from an industrial background. The theme is well represented by the four invited papers. Three of these discuss ways in which formal methods are being introduced, and the fourth presents an international survey of industrial applications. It also provides a reminder of the improvements which are needed to make these methods an accepted part of software development. In addition the volume contains several submitted papers on the industrial use of Z, two of which discuss the key area of safety-critical applications. There are also a number of papers related to the recently-completed ZIP project. The papers cover all the main areas of the project including methods, tools, and the development of a Z Standard, the first publicly-available version of which was made available at the meeting. Finally the volume contains a select Z bibliography, and section on how to access information on Z through comp.specification.z, the international, computer-based USENET newsgroup. Z User Workshop, London 1992 provides an important overview of current research into industrial applications of Z, and will provide invaluable reading for researchers, postgraduate students and also potential industrial users of Z. Flipped learning—in which students view recorded lectures outside of the classroom and then utilize class time to develop a broad range of knowledge and skills—is a relatively new phenomenon. This timely volume examines and organizes the emerging research on flipped learning in higher education. It identifies the types of courses, material, and learning objectives that are most effectively flipped, with specialized advice for faculty in STEM fields, the social sciences, and humanities. The book also provides evidence-based guidance on how to create and disseminate engaging recorded lectures; develop and implement in-class exercises and projects that help students meet learning objectives; orient students to the flipped classroom; and assess the effectiveness of flipped learning. The fully revised and updated second edition of this core textbook builds on the previous edition's success to bring an even sharper exploration of HRM in a real-world global context. With a critical approach that is woven into the chapters and encourages students to question assumptions in HRM, there is a consistent focus on the impact of globalization, the ways in which theory has addressed the implications of a globalized workforce, and the way HRM works in multinational corporations. Boasting a truly global orientation, this textbook draws on the expert knowledge of chapter authors from around the world, combining international case studies with a strong offering of pedagogical features. While adopting a rigorous academic approach, the book is also designed to engage students and elicit independent thought. This is an ideal core textbook for undergraduate and postgraduate students studying on general business and management degrees, specialist HRM degrees, and international business degrees. In addition, this an important supplementary text for International HRM modules and HRM modules on MBA programmes. New to this Edition: - Brand new chapters on Talent Management, International Assignments, Managing Global and Migrant Workers, and Sustainable HRM - Revised and refreshed international case studies including an array of examples from diverse, non-western regions of the world - 'HRM in the news' boxes, comprising issues from the media that are relevant to each chapter topic - 'Stop and reflect' boxes containing thought-provoking questions that encourage critical thinking Accompanying online resources for this title can be found at [bloomsburyonlineresources.com/human-resource-management-in-a-global-context](https://www.bloomsburyonlineresources.com/human-resource-management-in-a-global-context).
