Wonder Woman. Asterix the Gaul. Watchmen. These popular comics, and many others, use classical sources, narrative patterns, and references to enrich their imaginative worlds and deepen the stories they present. This volume explores that rich interaction. Son of Classics and Comics presents thirteen original studies of representations of the ancient world in the medium of comics.

Building on the foundation established by their groundbreaking Classics and Comics (2011), George Kovacs and C. W. Marshall have gathered a wide range of essays with a new, global perspective. Chapters are helpfully grouped to facilitate classroom use, with sections on receptions of Homer, on manga, on Asterix, and on the sense of a classic in the modern world. All Greek and Latin passages are translated. Lavishly illustrated, the volume significantly widens the range of available studies on the reception of the Greek and Roman worlds in comics, and deepens our understanding of comics as a literary medium. Son of Classics and Comics will appeal to students and scholars of classical reception as well as comics fans.

In AD 9 half of Rome's Western army was ambushed in a German forest and annihilated. Three legions, three cavalry units and six auxiliary regiments - some 25,000 men - were wiped out. It dealt a body blow to the empire's imperial pretensions and was Rome's greatest defeat. No other battle stopped the Roman empire dead in its tracks. Although one of the most significant and dramatic battles in European history, this is also one which has been largely overlooked. Drawing on primary sources and a vast wealth of new archaeological evidence, Adrian Murdoch brings to life the battle itself, the historical background and the effects of the Roman defeat as well as exploring the personalities of those who took part.

The Bumper Asterix Omnibus
Psychology Press

In English-speaking countries,

Francophone comic strips like Hergé's *Les Aventures de Tin Tin* and Goscinny and Uderzo's *Les Aventures d'Asterix* are viewed—and marketed—as children's literature. But in Belgium and France, their respective countries of origin, such strips—known as *bandes dessinées*—are considered a genuine art form, or, more specifically, "the ninth art." But what accounts for the drastic difference in the way such comics are received? In *Masters of the Ninth Art*, Matthew Screech explores that difference in the reception and reputation of *bandes dessinées*. Along with in-depth looks at Tin Tin and Asterix, Screech considers other major comics artists such as Jacque Tardi, Jean Giraud, and Moebius, assessing in the process their role in Francophone literary and artistic culture. Illustrated with images from the artists discussed, *Masters of the Ninth Art* will appeal to students of European popular culture, literature, and graphic art.
