Hi , first post here
and was looking for
some help
regarding my 54
plate Astra G with a
z16xep twin port
engine Basically the
car has a misfire but
currently has no
management light
on which means I
can't do a pedal test
to check if there is
any codes present
and I think that
somehow the
previous owner has
disabled the Amber
light with the
spanner through it .
