Dan Wynn wanted to explore space more than life itself, but a tragic accident left him too injured for NASA's space program. Second

chances don't come along every day, so when an old friend offered him one, he grabbed on with both hands. The next thing Dan knew, he was on the moon, piloting humanity's first starship while fighting his way through one peril after another. Little did Dan know that simple offer was anything but, and would lead him to the stars far beyond our own. The risks are

great. But if life knocked you down, what would you gamble to have one more shot at your dreams?
Excerpt: "Dan - ad astra!" Dan heard the order. Ad astra. To the stars. It was a toast the two of them had shared back in college, when they first stepped onto the roads which would lead them into space. It had been John's idea to use the toast as a code word now. Dan didn't even take

a deep breath before executing the order. He'd practiced this with Majel enough times in the simulator - not the part about having a gunman in the bridge, but if that order was ever given, it would be a true crisis. He checked the screen again. Visual range in only fifteen seconds. No time for anything else. He rapidly initiated the program, said a quick prayer, and pressed	the Enter button on his keyboard. Immediately, the ship began to shudder. This book is a heavily revised second edition of the original volume. The story length has been increased by about 60%, adding enormously more background to the characters and deepening of the personality of the world and crew. If you've already read the first edition,	you won't need to read this version to catch up - but fans of the series are sure to enjoy this expanded and improved "Author's Preferred Edition"! <u>Catalog of Copyright Entries. Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior

release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find

hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the

Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
